陈彦羽 多积累词汇，少自创些奇怪的表达

辛苦老师了。👍

Nowadays ,because of their **negative attitudes**,many students choose to leave school .There are two **reasons** to explain **this conditions** .

Teachers **always** ignore students' needs ,so **they** design some boring courses which have a negative effect on **their** study enthusiasm and lead them to lose interest in studying .**Chinese teaching methods** give priority to academic performance,because it can show teachers' abilities.In order to help students get higher grades ,**they** impart a great deal of knowledge which they prepare for students ,**no matter who can receive it or not** .Because teachers don't tell **them** why and how to understand knowledge ,like the math's formula or English vocabulary ,**they** just learn by rote. Facing a range of study materials ,some students cannot digest them quickly and find it difficult for them to finish their homework . They fail to keep pace with other students gradually ,after which they feel depressed and give up their study finally .

A number of students have their own opinions on studying . They think it hard for them to put **theories from schools** into practice ,so they cannot make good use of knowledge ,which **hinders them** **lend** a good job. For example ,schools do not **arrange students to study in work place** to help **them** gain a better understanding **on** theories .Furthermore ,**they** just teach them how to use **the** knowledge to cope with exams rather than help them tackle **living problems**. For the students who are unwilling to learn in universities ,especially ,they prefer to study **practical technologies** instead of literature, because they think **it** more interesting than memorizing knowledge .

Schools should **think highly of** the combination of theories and practical knowledge **for students involving in society**.Organizing some school trips or **increasing some vocational training** ,for instance ,allow students to **escape from campuses** to experience new study methods. Modifying teaching methods by using multimedia like computers ,videos and so on ,**which will attract students' attention and boost their study enthusiasm** ,so students are willing to study and **further their education** .

主句谓语在哪里!!!

All in all , poor teaching methods are a main **reason for students to reject to further** their study ,so it is important for schools to take action to improve their **educational situations**,

Nowadays ,depending on their negative attitude,many students choose to leave schools .There are two reasons to explain this condition .

Teachers always ignore students' needs ,so they designing some boring courses which have a negative effect on their study enthusiasm and make them lose interest in studying .Chinese teaching method gives priority on academic performance,because it can show teachers' abilities in some degree and it is always used to place students A or B. In order to realize their targets ,they impart so many knowledge what they prepare for students despite they receiving or not .Because teachers don't tell them why and how to understand ,like the math's formula or English vocabulary ,they just learn by rote. Facing with materials like hills ,some disadvantaged students cannot digest quickly and find it difficult for them to accomplish their homework . They fail to keep the pace with other students gradually ,after which they feel depressed and give up their study finally .

A number of students have their own opinions on studying . They think it hard for them to put the theory from schools into practice ,so they cannot make good use of knowledge ,which hinder them hint a good job. For example ,schools do not arrange students to study in workplace to help them gain a better understanding in theories .Furthermore ,they just teach them how to use the knowledge to cope with exams rather than help them tackle living problems. For the students who are unwilling to learn in universities ,especially ,they prefer to study practical technologies instead of literature, because they think it is more interesting than memorizing knowledge without appliance.

For the sake of students involving into society successfully ,schools should thing highly of the combination of theories and practical knowledge ,which improve their opinions for their schools. Organizing some school trips or increasing some vocational training ,for instance ,allow students to escape from campuses to experience new study methods. Modifying teaching means by using multimedia like computers ,videos and so on ,which will attract students' attentions and warm the class atmosphere . Relying on the colorful teaching ways ,students are willing to participate in study and further their studying .

All in all ,the poor teaching format is a main reason for students rejecting to finish their study ,so it is important for school to take action to improve the bad situation,
