

表达奇怪. 没怎么看懂

With the rapid development of technology, people have more access to gain knowledge than before. Therefore, some people state that using distance-learning programs to study at home cannot instead of attending college or university. I do not agree with this view for the following reasons.

Firstly, students gain knowledge by distance learning courses can study at their own pace. When they have tough questions, they can search answers by themselves, which do not have to waste time for others. Therefore, it is necessary for students to have a distance education.

In addition, it is clear that studying at home can save time and reduce costs. Nowadays, traffic will be congested seriously. for most students ,they waste a lot of time on the road. Meanwhile, it is obvious that studying at home can save money on transportations.

That is not to say that traditional education has no benefits to students. Students without teachers will surely be lost, but students who simply rely on teachers for knowledge are not really learning.
