

1: 自然地理

atmosphere, hydrosphere, lithosphere

core, mantle, crust

Magnetic, gravity, property

plates, drift, crack (flaw)

trigger, interact, absorb

melt, thaw, dissolve

release, accumulate, decompose

Volcano, erupt, magma

tsunami (tidal), hurricane, tornado (typhoon)

earthquake, avalanche, glacier

fertile (fertiliser), barren, arable

Arid, acid (alkali), ozone (layer)

El Nino, greenhouse, phenomenon

Dioxide, pollutant (pollution), toxic

Devastate, deteriorate, aggravate

Contaminate, erode, degrade (upgrade)

Recycle, conservation(conversation), ecosystem(eco-friendly)

Sediment(deposit), petroleum(petrol, gasoline), fume(smoke, fog, smog)

Solar(lunar calendar), radiation(ultraviolet), thermodynamic

hazard,catastrophe (disaster), endanger(jeopardise)

drought(famine, flooding), deforestation, desertification (dessert)

Delta, plain, plateau (basin)

Valley, peak, range

Rainfall, precipitation, humidity

Circulation, precipitation, evaporation

Meteorology, Celsius (centigrade), Fahrenheit

Longitude, latitude, altitude (attitude)

Equator, arctic (Antarctic), border (boundary)

Tropical, temperate (mild), pole

Terrain (terrace), landscape, continent

Periodically, irregularly, random

Intensive, severe, destructive

upcoming, inevitable, irreversible

Marine, navigation, current

Alternative, opt (option), prioritise(prior, priority)
