

2: 太空探索

Spacecraft, probe, exploration

molecule, particle, nuclear(nucleus)

orbit, polar, flyby

crater, volcano, magma

organism, fossil, sample

ultraviolet, radioactive

speculate, hypothesis, predict

collision, squash, fragment

lurk, discernible, invisible

composition, compound, substance(mass)

dimension, spectrum, frequency

antenna, circuit, signal

approximately, initially, periodically

hydrogen, carbon dioxide, oxygen

exotic, desolate, desperate

vent, gush, torrent

tropical, thermal, frigid

galaxy, cosmos, universe, interstellar

extraterrestrial(terrestrial), astronomical, celestial

spectacle, observatory, telescope

evaporate, synthesize, volume

permanent, equivalent, impact

formation, method, motion

comet, coma, meteorite

accident, variation, dynamics

diameter, amateur, flexibility

immense, cataclysmic, overwhelming

liquid, solid, fluid

expedition, replenish, detect

duration, precaution, refraction

inferior, conjunction, invasion

ecliptic, eclipse, solar, lunar

determine, estimate, transit

sunset, tidal, intelligence

controversial, obscure, inconspicuous

intuitive, distinct, identical

enormous, vast, principle

propulsion, evolve, manifest

dust, envelope, chunk

pressure, curve, tail

atom, ion, electron
