照妖镜：

I'll start with a general description. Sleepy lizards live in Western and South Australia, where they're quite common. Unlike European lizards, which are mostly small, green and fast-moving, sleepy lizards are brown, but what's particularly distinctive about them is the colour of their tongue, which is dark blue, in contrast with the lining of their mouth which is bright pink. Q31

And they're much bigger than most European lizards. They have quite a varied diet, including insects and even small animals, but they mostly eat plants of varying kinds. Q32

Even though they're quite large and powerful, with strong jaws that can crush beetles and snail shells, they still have quite a few predators. Large birds like cassowaries were one of the main ones in the past, but nowadays they're more likely to be caught and killed by snakes. Actually, Q33

another threat to their survival isn't a predator at all, but is man-made – quite a large number of sleepy lizards are killed by cars when they're trying to cross highways.

谢谢仙姑!!! 我终于成功通过了听力，简直开心😄

12月4号听课，16号考试

之前学了三四个月，听力一直5.5，听了仙姑的课，就7.5了

仙姑太神了!!!

只用了12天就5.5-7.5了吗👏👏👏

对啊

我还在上班

天天只能晚上学一会儿

#仙姑报分# 非常厉害了，听力进步最大，提高两分，7-9👍👍

Now, this is one area that much less is generally known about than conventional or traditional crime. It has been relatively ignored by the mass media – for example, it tends to be under-reported in comparison with conventional crime in news broadcasts, and in crime serials and films and so on – they very rarely deal with corporate crime. And it also tends to be ignored in academic circles – there's been far more research on conventional crime and far more data is available.

Q33

Q34

There are several reasons for this lack of interest in corporate crime, compared with other types of crime. It's often very complex, whereas with conventional crime it's usually possible to follow what's going on without specialist knowledge. As well as this, whereas conventional crime usually has a lot of human interest, corporate crime often has much less. The third reason, and possibly the most significant one, is that very often the victims are unaware – they think their misfortune is an accident or that it's the fault of no-one in particular. They're unaware that they've been victims of a crime.

Q35

Q36

So, when we look at the effects of corporate crime we may find it's very difficult to assess the costs. But these costs can be very considerable in both their economic and social aspects.

Let's look at the economic costs first. For example, if a company is producing fruit juice and it dilutes its product so that it's just a little below the concentration it should be, many millions of people may be paying a small amount extra for their carton of orange juice. Now small amounts like this may seem insignificant for individual customers – too small to worry about – but for the company this deception might result in massive illegal profit. However, all studies of corporate crime agree that the individuals are in fact deprived of far
