真题15和真题16出题比例对比

Let's get started

- You are going to watch a short video
 - Judge whether the following statements are YES/NO/NOT GIVEN
 - You are going to watch the video Once Only
- ❶ *Babies could hear the voice of their mother while in the womb.*
 - ❷ *Talking to babies with normal pitch and no repetition is good for them.*
 - ❸ *Babies' brains are capable of containing more than 5 different languages.*

定位关键词是什么？判断什么？

- ① *Babies could hear the voice of their mother while in the womb.*
- ② *Talking to babies with normal pitch and no repetition is good for them.*
- ③ *Babies' brains are capable of containing more than 5 different languages.*

听什么？判断什么？

- ① Babies **could hear** the **voice of their mother** **while in the womb**.
- ② Talking to babies with **normal pitch** and **no repetition** is **good** for them.
- ③ Babies' **brains** are capable of containing **more than 5 different** languages.

听什么？判断什么？

- ① Babies **could hear** the **voice of their mother** **while in the womb**.
- ② Talking to babies with **normal pitch** and **no repetition** is **good** for them.
- ③ Babies' **brains** are capable of containing **more than 5 different** languages.

① Babies **could hear** the **voice of their mother** **while in the womb**.

**EVEN BEFORE BIRTH,
THEY ARE ABLE TO HEAR
THEIR MUM'S VOICE**

TRUE

答案对吗?

➤ Judge whether the following statements are YES/NO/NOT GIVEN

① Babies **could hear** the **voice of their mother** **while in the womb**.

**EVEN BEFORE BIRTH,
THEY ARE ABLE TO HEAR
THEIR MUM'S VOICE**

YES

TRUE
FALSE
NOT GIVEN

if the statement agrees with the information
if the statement contradicts the information
if there is no information on this

- 8 The growing importance of the middle classes led to an increased demand for dictionaries.
- 9 Johnson has become more well known since his death.
- 10 Johnson had been planning to write a dictionary for several years.
- 11 Johnson set up an academy to help with the writing of his *Dictionary*.
- 12 Johnson only received payment for his *Dictionary* on its completion.
- 13 Not all of the assistants survived to see the publication of the *Dictionary*.

YES
NO
NOT GIVEN

if the statement agrees with the writer's claims
if the statement contradicts the writer's claims
if it is impossible to say what the writer thinks about this

- 27 Environmentalists take a pessimistic view of the world for a number of reasons.
- 28 Data on the Earth's natural resources has only been collected since 1972.
- 29 The number of starving people in the world has increased in recent years.
- 30 Extinct species are being replaced by new species.
- 31 Some pollution problems have been correctly linked to industrialisation.
- 32 It would be best to attempt to slow down economic growth.

1. 两种形式

T/F/NG - 事实信息

Y/N/NG - 作者观点

2. 书写要求

全称大写、不混写

- ② Talking to babies with **normal pitch** and no **repetition** is **good** for them.

NO

- ③ Babies' **brains** are capable of containing **more than 5 different languages**.

一、T/F/NG可不可以和Y/N/NG互换？

不可以

二、我们有没有用常识做题？

没有

三、题目顺序和文中对应是正序还是乱序？

绝对正序

Step 3

• 找定位句

Step 4

• 判断信息

Do the following statements agree with the information given in Reading Passage 2?

YES if the statement agrees with the claims of the writer

NO if the statement contradicts the claims of the writer

NOT GIVEN if it is impossible to say what the writer thinks about this

- 21 Water use per person is higher in the industrial world than it was in Ancient Rome.
- 22 Feeding increasing populations is possible due primarily to improved irrigation systems.
- 23 Modern water systems imitate those of the ancient Greeks and Romans.
- 24 Industrial growth is increasing the overall demand for water.
- 25 Modern technologies have led to a reduction in domestic water consumption.
- 26 In the future, governments should maintain ownership of water infrastructures.

- 21 Water use per person is **higher** in the industrial world **than** it was in Ancient Rome.
- 22 Feeding increasing populations **is possible due primarily to** improved irrigation systems.
- 23 Modern water systems **imitate** those of the ancient Greeks and Romans.
- 24 Industrial growth **is increasing** the overall demand for water.
- 25 Modern technologies have **led to a reduction** in domestic water consumption.
- 26 In the future, governments should **maintain ownership** of water infrastructures.

定位是前提

考点是关键

A 段:

原文: At the height of the Roman Empire, nine major systems, with an innovative layout of pipes and well-built sewers, supplied the occupants of Rome with as much water per person as is provided in many parts of the industrial world today.

- 21 Water use per person is **higher** in the industrial world **than** it was in Ancient Rome.

• NO

B段

原文: Food production has kept pace with soaring populations **mainly because of** the expansion of artificial irrigation systems that make possible the growth of 40 % of the world's food.

- 22 Feeding increasing populations **is possible due primarily to** improved irrigation systems.

YES

C段

原文： Yet there is a dark side to this picture: despite our progress, half of the world's population still suffers, with water services inferior to those available to the ancient Greeks and Romans.

- 23 Modern water systems **imitate** those of the ancient Greeks and Romans.

• NOT GIVEN

F段

原文：Although population, industrial output and economic productivity have continued to soar in developed nations, the rate at which people withdraw water from aquifers, rivers and lakes has **slowed**. And in a few parts of the world, demand has actually **fallen**.

- 24 Industrial growth **is increasing** the overall demand for water.

• NO

G段

原文： But since 1980, the amount of water consumed per person has actually **decreased, thanks to** a range of new technologies that help to conserve water in homes and industry.

- 25 Modern technologies have **led to a reduction** in domestic water consumption.

• YES

H段

原文：On the other hand, dams, aqueducts and other kinds of infrastructure will still have to be built, particularly in developing countries where basic human needs have not been met. But such projects must be built to higher specifications and with more accountability to local people and their environment than in the past.

- 26 In the future, governments should **maintain ownership** of water infrastructures.

• NOT GIVEN

六大考点

考点一般落在**动词、形容词、副词**上

是非

动 (宾)、表语、修饰 (定语或状语)

比较

比较级 (more than)、最高级 (the most)、异同 (similar/different)

因果

cause/lead to, because (of)/as a result of/due to

绝对

考点本质简化归类：

1. 特点和评价类
2. 动作及趋势类
3. 不同对象的关系类

32 For the **earliest tribes**, the **concept of sufficiency** was more important than the **concept of quantity**.

判断: TRUE

第2段第2、3句: Even the **earliest of tribes** had a system of numeration that, if not advanced, was **sufficient** for the tasks that they had to perform. Our ancestors had little use for actual numbers; instead their considerations would have been more of the kind *Is this enough? rather than How many?* when they were engaged in food gathering, for example.

庆历四年春，滕子京谪守巴陵郡；越明年政通人和、百废俱兴。

1. 庆历四年夏，滕子京谪守巴陵郡。
2. 庆历四年春，滕子京被贬巴陵郡。
3. 庆历四年春，滕子京左迁巴陵郡。
4. 庆历四年春，滕子京谪守巴陵郡；越明年生灵涂炭，怨声载道。
5. 庆历四年春，滕子京谪守巴陵郡；越明年又娶了两房姨太太。

14 La Gomera is the **most mountainous** of all the Canary Islands.

译文：拉戈梅拉是加那利群岛中山最多的。

第一段第1, 2句：La Gomera is one of the Canary Islands....
This small volcanic island is mountainous, with steep rocky slopes ...s highest peak.

14 La Gomera is the **most mountainous** of all the Canary Islands.

译文：拉戈梅拉是加那利群岛中山最多的。

第一段第1, 2句：La Gomera is one of the Canary Islands....
This small volcanic island is mountainous, with steep rocky slopes ...s highest peak.

这个小火山岛是多山的。但是并不能判断这里是山最多的地方

NOT GIVEN

15 Silbo is **only** appropriate for short and simple messages.

译文： 哨语只适合短的和简单的信息

第五段第2, 3句 :Carreiras explains that silbadores are able to pass a **surprising amount of information** "In daily life they use whistles to communicate short commands, **but any Spanish sentence could be whistled.** '

15 Silbo is **only** appropriate for short and simple messages.

译文： 哨语只适合短的和简单的信息

第五段第2, 3句 :Carreiras explains that silbadores are able to pass a **surprising amount of information** "In daily life they use whistles to communicate short commands, **but any Spanish sentence could be whistled.** '

FALSE

16 In the brain-activity study, silbadores and non-whistlers produced **different results**.

译文：在大脑活动的研究中，哨语者和非哨语者产生了不同的结果。

第六段最后两句：

The researchers found that other key regions in the brains frontal lobe also responded to the whistles, including those activated in response to sign language among deaf people. When the experiments were repeated with non-whistlers, however, activation was observed in all areas of the brain.

16 In the brain-activity study, silbadores and non-whistlers produced **different results**.

译文：在大脑活动的研究中，哨语者和非哨语者产生了不同的结果。

When the experiments were repeated with non-whistlers, **however**, activation was observed in all areas of the brain.
however 的逻辑关系基本以看出和前面的哨语者结果是不一样的。

TRUE

17 The Spanish introduced Silbo to the islands in the 15th century.

译文： 西班牙人在15世纪将哨语引入到这些岛屿。

第八段第1句： Carreiras says the origins of Silbo Gomero remain obscure, but that indigenous Canary Islanders , ... , already had a whistled language when Spain conquered the volcanic islands

17 The Spanish introduced Silbo to the islands in the 15th century.

译文： 西班牙人在15世纪将哨语引入到这些岛屿。

第八段第1句： Carreiras says the origins of Silbo Gomero remain obscure, but that indigenous Canary Islanders , ... , already had a whistled language when Spain conquered the volcanic islands

FALSE

18 There is precise data available regarding **all** of the whistle languages in existence today.

译文：所有现存的哨语都有精确的数据。

第八段第3句： There are thought to be as many as 70 whistled languages still in use, **though only 12 have been described and studied scientifically.**

18 There is precise data available regarding **all** of the whistle languages in existence today.

译文：所有现存的哨语都有精确的数据。

第八段第3句： There are thought to be as many as 70 whistled languages still in use, **though only 12 have been described and studied scientifically.**

FALSE

19 The children of Gomera **now learn** Silbo.

译文： Gomera的孩子们现在学哨语。

第九段第3句： Since 1999, Silbo Gomero has been taught in all of the island's elementary schools.

19 The children of Gomera **now learn** Silbo.

译文： Gomera的孩子们现在学哨语。

第九段第3句： Since 1999, Silbo Gomero has been taught in all of the island's elementary schools.

TRUE

- 14 Arthur Koestler considered laughter **biologically important** in several ways.
- 15 Plato believed humour to be **a sign of above-average intelligence**.
- 16 Kant believed that a successful joke **involves the controlled release of nervous energy**.
- 17 Current thinking on humour has **largely ignored** Aristotle's view on the subject.
- 18 Graeme Ritchie's work **links jokes to artificial intelligence**.
- 19 Most comedians **use personal situations as a source of humour**.
- 20 Chimpanzees **make particular noises** when they are playing.

第一段: The writer Arthur Koestler dubbed it the luxury reflex: 'unique in that it serves **no apparent biological purpose**'.

14 Arthur Koestler considered laughter **biologically important** in several ways.

FALSE

Theories about humour have an ancient pedigree. Plato expressed the idea that humour is simply a delighted feeling of superiority over others. Kant and Freud felt that joke-telling relies on building up a psychic tension which is safely punctured by the ludicrousness of the punchline. But most modern humour theorists have settled on some version of Aristotle's belief that jokes are based on a reaction to or resolution of incongruity, when the punchline is either a nonsense or, though appearing silly, has a clever second meaning.

15 Plato believed humour to be a sign of above-average intelligence.
NOT GIVEN

Theories about humour have an ancient pedigree. Plato expressed the idea that humour is simply a delighted feeling of superiority over others. Kant and Freud felt that joke-telling relies on building up a psychic tension which is safely punctured by the ludicrousness of the punchline. But most modern humour theorists have settled on some version of Aristotle's belief that jokes are based on a reaction to or resolution of incongruity, when the punchline is either a nonsense or, though appearing silly, has a clever second meaning.

16 Kant believed that a successful joke involves the controlled release of nervous energy. TRUE

Theories about humour have an ancient pedigree. Plato expressed the idea that humour is simply a delighted feeling of superiority over others. Kant and Freud felt that joke-telling relies on building up a psychic tension which is safely punctured by the ludicrousness of the punchline. But most modern humour theorists have settled on some version of Aristotle's belief that jokes are based on a reaction to or resolution of incongruity, when the punchline is either a nonsense or, though appearing silly, has a clever second meaning.

17 Current thinking on humour has largely ignored Aristotle's view on the subject.

FALSE

Graeme Ritchie, a computational linguist in Edinburgh, studies the linguistic structure of jokes in order to understand not only humour but language understanding and reasoning in machines. He says that while there is no single format for jokes, many revolve around a sudden and surprising conceptual shift. A comedian will present a situation followed by an unexpected interpretation that is also apt.

18 Graeme Ritchie's work links jokes to artificial intelligence.

TRUE

19 Most comedians use personal situations as a source of humour.

NOT GIVEN

However, there is another type of laughter, the laughter of social appeasement and it is important to understand this too. Play is a crucial part of development in most young mammals. Rats produce ultrasonic squeaks to prevent their scuffles turning nasty. Chimpanzees have a 'play-face' - a gaping expression accompanied by a panting 'ah, ah' noise.

20 Chimpanzees make particular noises when they are playing.

TRUE

Exercise 4 OG T3-P1 Q1-6综合演练

In boxes 1–6 on your answer sheet, write

TRUE	<i>if the statement agrees with the information</i>
FALSE	<i>if the statement contradicts the information</i>
NOT GIVEN	<i>if there is no information on this</i>

- 1 Commuters are often compared favourably with worker ants.
- 2 Some ants within a colony have leadership roles.
- 3 Forager ants tell each other how far away the food source is.
- 4 Forager ants are able to react quickly to a dangerous situation.
- 5 Termite mounds can be damaged by the wind.
- 6 Termites repair their mounds without directly communicating with each other.

Insects, birds and fish tend to be the creatures that humans feel furthest from. Unlike many mammals they do not engage in human-like behaviour. The way they swarm or flock together does not usually get good press coverage either: marching like worker ants might be a common simile for city commuters, but it's a damning, not positive, image. Yet a new school of scientific theory suggests that these swarms might have a lot to teach us.

- 1 Commuters are often compared favourably with worker ants.

- 1 Commuters are often compared favourably with worker ants.

FALSE

第二段最后两句

similar function for the companies where we work or the communities where we live.' Ants are not intelligent by themselves. Yet as a colony, they make wise decisions. And as Gordon discovered during her research, there's no one ant making decisions or giving orders.

- 2 Some ants within a colony have leadership roles.

第二段最后两句

similar function for the companies where we work or the communities where we live.' Ants are not intelligent by themselves. Yet as a colony, they make wise decisions. And as Gordon discovered during her research, there's no one ant making decisions or giving orders.

- 2 Some ants within a colony have leadership roles.

FALSE

Take food collecting, for example. No ant decides, 'There's lots of food around today; lots of ants should go out to collect it.' Instead, some forager ants go out, and as soon as they find food, they pick it up and come back to the nest. At the entrance, they brush past reserve foragers, sending a 'go out' signal. The faster the foragers come back, the more food there is and the faster other foragers go out, until gradually the amount of food being brought back diminishes. An organic calculation has been made to answer the question, 'How many foragers does the colony need today?' And if something goes wrong – a hungry lizard prowling around for an ant snack, for instance – then a rush of ants returning without food sends waiting reserves a 'Don't go out' signal.

- 3 Forager ants tell each other how far away the food source is.
- 4 Forager ants are able to react quickly to a dangerous situation.

Take food collecting, for example. No ant decides, 'There's lots of food around today; lots of ants should go out to collect it.' Instead, some forager ants go out, and as soon as they find food, they pick it up and come back to the nest. At the entrance, they brush past reserve foragers, sending a 'go out' signal. The faster the foragers come back, the more food there is and the faster other foragers go out, until gradually the amount of food being brought back diminishes. An organic calculation has been made to answer the question, 'How many foragers does the colony need today?' And if something goes wrong – a hungry lizard prowling around for an ant snack, for instance – then a rush of ants returning without food sends waiting reserves a 'Don't go out' signal.

- 3 Forager ants tell each other how far away the food source is.
- 4 Forager ants are able to react quickly to a dangerous situation.

NG

TRUE

underlies the complex constructions that termites build. Termites do not have an architect's blueprint or a grand construction scheme. They simply sense changes in their environment, as for example when the mound's wall has been damaged, altering the circulation of air. They go to the site of the change and drop a grain of soil. When the next termite finds that grain, they drop theirs too. Slowly, without any kind of direct decision-making, a new wall is built. A termite mound, in this way, is rather like a wiki website. Rather than meeting up and talking

- 5 Termite mounds can be damaged by the wind.
- 6 Termites repair their mounds without directly communicating with each other.
