日语介绍: Japanese is the official language of Japan, and I think the tone of it is very beautiful. For example, “aligado” means “thank you” in English. It’ s rather cute, right?

日语原因: I wanted to travel to japan at that time, and I believed that Japanese would make the trip better.

日语学习: Including listening to Japanese songs, watching Japanese animations and attending related classes.

难逻辑: Grammatical structure and pronunciation habits of Japanese are different from Chinese, so I always forgot the right way to organize a full sentence.

Moreover, I couldn’ t concentrate on one thing for a long time. I mean; after an hour of study, I needed to play for a while, which made the progress very slow.

成就感逻辑: It gave me a sense of achievement, because now, I can use Japanese to have some simple conversations with others.

不放弃逻辑: No matter how your heart is grieving, if you keep on believing, the dream that you wish will come true.
