问题

should we ban all gas-powered vehicles?

答案

第三道题:

I don't suppose it's a good idea to ban all gas vehicles altogether/entirely because this would definitely lead to a lot of backlash.

Instead, a government should try to do it step by step

For example, people should ~~encouraged~~ be encouraged to use greener forms of transportation

like walking and pedaling

and also we could limit the number of gas cars that are permitted to enter the city center.

in this way, the environment could be better protected.

however, i don't think we should ban gas-powered vehicles entirely.

- *Describe a difficult decision that you once made*
- *you should say:* **sedentary lifestyle**
 - *what the decision was*
 - *when you made this decision*
 - *how long it took to make the decision*
- *and explain why it was difficult to make*

回答

I made this decision to break up with my ex-girlfriend two years ago
and it was in the middle of the summer
and one day, one afternoon, actually ... i told my girlfriend that
we should call it quits.
the reason for that is ... um ... it had rained pretty ~~heavily~~ heavily
the day before, and my ex-girlfriend was caught in the rain
but i was working that day and i couldn't have any break
so i couldn't go to her with an umbrella.
she threatened me by saying that she would break up with me
but ~~it~~ it was actually me that said we should end it.

题目

- *Describe something you do that is a waste of time*
- *you should say:*
 - *what it is* spend time on taobao
 - *when you usually do it* browse on taobao
 - *why you do it*
- *and explain why you think it is a waste of time*

回答

I spend a lot of time on taobao every single day
and typically it happens at night, before going to bed
i usually hit the sack around 11:30
and began to browse on this app from 10:30.
this is because it's when i'm free, when i have some downtime.
during the day, i have to work pretty hard at school and
that takes up a lot of time
so there's no way i can spend half an hour or so on taobao.
