得分点3： 清晰的论点句解释说明(9)

主体段落一： Indeed, when it comes to **social stability**, education plays a more crucial role than arts.

Undeniably, through access to education, individuals can not only acquire a wide range of knowledge and professional skills which are essential for employment but also learn how to distinguish right from wrong, which can reduce the risk of criminality. By contrast, the exposure to arts cannot directly help people to be employable. Thus, for the public, the investment in education should be given as the priority. arts are an important reminder of national history. ←

得分点3：清晰的论点句解释说明(9)

主体段落二： However, it does not mean that the investment in arts is meaningless because arts can positively contribute to **mental health** which is also one key factor for social stability. In fact, arts are used in a variety of ways to heal emotional injuries, increase understanding of oneself and others as well as change behaviors and thinking patterns, such as music engagement, visual arts therapy, expressive writing and so on, because arts provide an access for people to express their negative feelings and emotions. As a result, the healing power of arts can prevent people from committing extreme behaviors. ←

得分点3： 清晰的论点句解释说明(9)

主体段落三： Moreover, arts can **facilitate education**. A good example of this would be the countless paintings of historic events and key figures that became prominent and fashionable during the Renaissance. These pictures now deepen not only our understanding of those events but also the extensive knowledge about culture, lifestyles, and the minds of people at that time. It is therefore likely that arts give important clues to future generations as to a wide range of areas in a vivid form.↵

1. In some countries, students pay their college or university fees, while in some others, the government pays for them. Do the advantages of governments paying for fees outweigh the disadvantages?↵

如何看材料

主体段落一: **Indeed**, some may argue that free access to university education **is a waste of public money**.

In recent years, there has been a rise in the number of graduates. But many graduates are now leaving university to take jobs which do not require a degree. Therefore, it is a mistake to continue to fund the public expansion of university education because the economy does not need more graduates. ↵

↵

主体段落二: **However**, when it comes to **the achievement of equality**, the government should fund university education. If students must pay for university education, this may dissuade them especially those born in impoverished families. In theory, students could take out loans or work part-time, but this may discourage students from studying and instead may enter the job market earlier. ↵

↵

主体段落三: **Also**, university education can **reap enormous economic benefits to society**. Higher education leads to a more educated and productive workforce. Countries with high rates of university education generally have higher levels of innovation and productivity growth. Therefore, there is a justification for the government subsidizing higher education. ↵
