### 1.introduction (背景+改写题目+个人立场)

The influence of computer technology is a thorny issue that confronts many countries all over the world. The issue about whether this development can produce positive impacts or not remains controversial. In my view, it will generate enormous benefits to the public.

BP1:Indeed, the advancement of computer technology would cause job destruction.

BP2: However, the fast development of computers can positively contribute to job creation.

BP3: Moreover, computerization can help human beings to cope with substantial social problems.

5. To conclude, while some people are concerned about the negative impact of computer technology on the employment aspect, I still harbor the view that this development can positively contribute to the whole society. In the long run, our human beings can significantly benefit from the advancement of high technology.

## 得分点3：清晰的论点句解释说明(9)

主体段落一：Indeed, when it comes to **social stability**, education plays a more crucial role than arts.

Undeniably, through access to education, individuals can not only acquire a wide range of knowledge and professional skills which are essential for employment but also learn how to distinguish right from wrong, which can reduce the risk of criminality. By contrast, the exposure to arts cannot directly help people to be employable. Thus, for the public, the investment in education should be given as the priority. arts are an important reminder of national history. ←

## 得分点3： 清晰的论点句解释说明(9)

主体段落二： However, it does not mean that the investment in arts is meaningless because arts can positively contribute to **mental health** which is also one key factor for social stability. In fact, arts are used in a variety of ways to heal emotional injuries, increase understanding of oneself and others as well as change behaviors and thinking patterns, such as music engagement, visual arts therapy, expressive writing and so on, because arts provide an access for people to express their negative feelings and emotions. As a result, the healing power of arts can prevent people from committing extreme behaviors. ←

## 得分点3： 清晰的论点句解释说明(9)

主体段落三： Moreover, arts can **facilitate education**. A good example of this would be the countless paintings of historic events and key figures that became prominent and fashionable during the Renaissance. These pictures now deepen not only our understanding of those events but also the extensive knowledge about culture, lifestyles, and the minds of people at that time. It is therefore likely that arts give important clues to future generations as to a wide range of areas in a vivid form.↵

15. Some people believe that children's leisure activities must be educational.

Otherwise, they are a complete waste of time. Do you agree or disagree?←

X2

认准李仙童 雅思稳准狠

个人立场: the activities simply for amusement are meaningful to some extent.↵

论点一: the purpose of leisure activities is far beyond equipping students with knowledge. ↵

举例: sports activities ---strengthen their muscle and immune system—reduce the risk of suffering from diseases like obesity and diabetics↵

解释: to acquire academic knowledge is not the only task of an individual / any activities have distinctive purposes. ↵

结论: attending leisure activities is one important way when it comes to the comprehensive development of children.↵

论点二: in play, children can build their own understanding and thinking. ↵

解释: leisure activities ---be in spare time when one is free to do anything they like--- children understand themselves and others and acquire the knowledge of the physical world↵

拓展: be educational ---restrict the freedom of children –deprive them of their happiness from having fun in engaging co-curricular activities with peers---not learn knowledge but simply want to share moments with friends ↵

举例: role-play games can develop their imagination by nature.↵

1. In some countries, students pay their college or university fees, while in some others, the government pays for them. Do the advantages of governments paying for fees outweigh the disadvantages?↵

X2  
认准李仙童 雅思稳准狠

3U1X  
学

主体段落一: **Indeed**, some may argue that free access to university education **is a waste of public money**. In recent years, there has been a rise in the number of graduates. But many graduates are now leaving university to take jobs which do not require a degree. Therefore, it is a mistake to continue to fund the public expansion of university education because the economy does not need more graduates. ↵

主体段落二: **However**, when it comes to **the achievement of equality**, the government should fund university education. If students must pay for university education, this may dissuade them especially those born in impoverished families. In theory, students could take out loans or work part-time, but this may discourage students from studying and instead may enter the job market earlier. ↵

主体段落三: **Also**, university education can **reap enormous economic benefits to society**. Higher education leads to a more educated and productive workforce. Countries with high rates of university education generally have higher levels of innovation and productivity growth. Therefore, there is a justification for the government subsidizing higher education. ↵

X2

认准李仙童 雅思稳准狠

个人立场: the young should be given more freedom. ↵

主体段落一: Parents who want to have strict control over their children believe that it is the best way of parenting. There are certainly some positive aspects to this style of parenting.

To start with, children can benefit from the immense experience of their parents. Since parents know better than children, in most situations they will be able to make more informed decisions. However, there are also some downsides to this approach. For one thing, times have changed. The challenges that our kids face today are entirely different from what we faced when we were their age. As a result, the assumption that parents can always make the right decisions does not hold much water in the current scenario.↵

主体段落二: By contrast, if children are encouraged to think independently, they develop confidence which will stand them in good stead when they grow up. For example, children with independent thinking skills would prefer to work out a solution rather than ask other people for help when they are confronted with a problem. On the other hand, children who are used to getting told what to do are reluctant to take initiatives and when they meet difficulties at work or life, their first reaction is to ask their parents for help. Obviously, it is not difficult to see which of these two types of kids will become successful later in life. ↵

17. some people want the government to spend money on researching life on other planets. Others, however, think it is a waste of public funds and there are too many problems on our own planet to be fixed first. Discuss both views and give your own opinion. ↵

On the one hand, the state funds should be distributed to the aspects aiming to deal with substantial living problems facing human beings. poverty, disease, violence, environmental pollution, and more are constantly plaguing humanity, and even our best efforts far cannot address all of everybody's needs. Governments should prioritize humanitarian needs. Why study the resources on other planets when air pollution existing on Earth is still becoming severe? Thus, if individual suffering is not solved, it is not wise for the government to fund the research on other planets.↵

On the other hand, investing in exploring other planets is investing in the betterment of humanity. The result of space exploration is not only fantastic scientific discoveries, but also many useful inventions which have impacted our daily lives in more ways than most people imagine, from helping to improve artificial limbs to using lasers developed for monitoring gases in the atmosphere for heart surgery. Thus, we should not be shortsighted when evaluating the importance of doing space research. ↵

# 审题练习---环境

主体段落一: on the one hand, climate change can **promote the development of green businesses**. Once climate change has concerned the masses, numerous corporations worldwide have switched to producing eco-friendly items such as electric cars, organic foods, plant-based accessories and so on. For example, Tesla, which is one of the largest automobile manufacturers, focuses on producing stylish electric cars. As a result, in the face of climate change, there appears the emerging sector of green energy consumer products, which has inspired the new generation of entrepreneurs to see environmental protection as a core competitive force for growth in profits. ↵

主体段落二: on the other hand, climate change would **increase the risk for businesses**. Due to climate change, many countries have been seriously affected by climate-related natural disasters, such as wildfires in Australia, record temperatures in America, flooding in Pakistan and China, which has not only caused the loss of living places for humans but also economic decline in the industries depending on climate like agriculture. For instance, Pakistan, which is vulnerable to climate change and lacks resources to deal with it, has fallen in poverty because of the power outage caused by floods. Therefore, if climate change is not solved, it will cause extreme financial damage to many industries. ↵

↵

X2

# 审题练习---信息科技

主体段落一： **On the one hand**, working from home **creates many opportunities to the society**. Not restricted by geographical barriers and time, people living anywhere can get jobs which used to be only available in metropolises, which can lead more people to **achieve a life of well-being**. Meanwhile, the physically-impaired are enabled to realize their personal value in a society, thus building self-confidence. In addition, remote working can also benefit family connection. Nowadays, many women must quit their jobs to take care of their children. If companies allow them work from their home, they can join the workforce but also can look after their kids. This can enhance their life satisfaction. ↵

主体段落二： **On the other hand**, remote working **has its drawbacks** too. Working separately might **not always ensure working efficiency**. Without the experience of working together in a team, employees cannot easily build the sense of group belonging when handling working tasks alone at home. The feeling of isolation is not good for people

to build mutual trust and accomplish a common task cooperatively. As a result, the quality of work cannot be entirely ensured. ↵

14. Advertising discourages from being different individuals by making us all want to be or look the same. To what extent do you agree or disagree?↵

X2

认准李仙童 雅思稳准狠

# 审 题 练 习 --- 信息科技

BP1: **It is true that** people **are influenced by advertising** and end up buying the same things. the essence of advertising is profit-driven, which means that products are always promoted as the items showing popularity. consumers particularly those people who are fashion followers tend to choose what they see in advertisements. As a result, they would wear the same style of clothes to show their sensitivity to fashion.↵

↵

BP2: **However,** to decide whether to buy advertised items or not **is ultimately a subjective issue**. Even if some people may choose those trendy clothes or accessories, what enables them to make buying decisions is not only the consideration about whether the items are in fashion or not but also whether they are suitable to them or not. Therefore, advertising is not the main reason.↵

↵

BP3: **In addition,** there are a variety of advertisements that **provide consumers a wide selection of items**. In the context of commercial competitions, the items in the same category are different in brands, styles and functions, and the potential consumers they target vary from each other. The brand 'Zara' is promoted as a symbol of fashion among the young, while the brand 'Muji' is advertised as a representation of the simplicity of life. Thus, advertisements do not make people indistinguishable from each other.↵
