得分点2： 清晰的论点句（预测11）

- 反方立场论点：**To some extent, traditional games can cultivate children's social language skills.** The rules for many traditional games are not in the written form, which means that when children play a game with their peers, they need to work on conversational turn taking, like presenting how to play a game and verbally expressing 'my turn' and 'your turn'. If there is one kid who cannot follow the rules, other children need to explain what to do and what rules one cannot break. Such language skills are not frequently practiced in modern games.
- 个人立场论点一：**However, modern games mostly focus on the development of the skills to solve the problems that take place in real time.** For example, in the board game, players roll dice to move around the game board, buying and trading properties, and developing them with houses and hotels. Players collect rent from their opponents, with the goal being to drive them into bankruptcy. This real-life game show children money lessons from the early game, including the importance of beginning investing, not pulling all your eggs in one basket and planning for the unexpected by always having a rainy-day fund. As those are the issues that happen in modern society, traditional games do not pay attention to them.

得分点2：清晰的论点句

- 个人立场论点二： **In addition, more modern games put much emphasis on the development of social skills.** in modern society where social activities are becoming fewer than before, video games are a good way for children to always be connected with their fellows. For example, in a PC game called 'animal crossing', players will be asked to accomplish certain tasks for new animal villagers moving into their town in order to develop a relationship with them, like taking a package to a neighbor or catching a butterfly for them. From the game, younger children can learn how important it is to be helpful to those around you and how to communicate with others.

1. More people are using mobile phones and computers to communicate.

Therefore, people are losing the ability to communicate with each other face to

face. To what extent do you agree or disagree?(课上讲解练习)←

3. Some people believe that the range of technology available to individuals is increasing the gap between the rich people and the poor people. Others think this has an opposite effect. Discuss both views and give your own opinion.↵

4. Should education and healthcare be free of charge and funded by the government, or should it be the responsibility of the people to pay for these services? Discuss the above and give your opinion using examples.↵

个人立场论点一: **education is largely considered a basic right.** A population unable to calculate, read, write or even learn would be doomed in such a competitive global economy. Globalization has increased competition and shifted the emphasis to knowledge, information and science. A state education should, therefore, be freely available to everybody. However, if people wish to purchase private education, this should also be allowed or even encouraged. Private education reduces the strain on public services and provides a source of tax revenue for the government, in effect, subsidizing state education.↵

个人立场论点二: **health services must undoubtedly be available to all because the entire nation is paying taxes and, therefore, should not be excluded from any service.**

Take the NHS in the UK, for example; this organization caters for the entire population, and no private medical insurance is needed. Unfortunately waiting lists can be long and service is occasionally slow; therefore, some purchase private medical insurance for a faster service. This reduces the workload of the public sector. ↵

5. Human activities have negative effects on plant and animal species. Some people think it is too late to do anything about this problem. Others believe that effective measures can be taken to improve this situation. Discuss both views and give your opinion.↵

6. Some people argue that job satisfaction is more important than job security, while others believe that they cannot always expect job satisfaction and a permanent job is more important. Discuss both views and give your opinion.↵

个人立场: it is a subjective issue.↵

第一方论点: **On the one hand, some people opine that having a permanent job is essential for stable life even if it is not as fulfilling as one wants it to be.** They are more inclined towards making a living without thinking about the long-term purpose. For instance, a daily-wage worker is more focused on earning his bread and butter rather than

worrying about the amount of labor that needs to be put in as he has only one goal and that is to feed his family. Overall, being able to work and generate income is itself a blessing for these people.↵

第二方论点:**On the other hand, many others, especially youngsters, believe that having a satisfying job is crucial for the mental health of an individual.** If not content with the job he or she takes, an individual would generate negative emotions such as anxiety, frustration and so on. For example, if employees are required to devote a surplus of time and energy to their on-the-clock pursuits at the expense of their personal lives, their personal lives will inevitably result in exhaustion, and then both work and life will unquestionably suffer. Therefore, work-life balance, which is a main element of job satisfaction, is mostly considered by individuals. ←

7. Some people say arts, such as music and painting, cannot directly improve the quality of people's life, so the government should spend money on other areas.
