(剑 5-3)

参考范文

The map shows two proposed locations for a new supermarket for the town of Garlsdon.

The first potential location (S1) is located **outside the town** and **off the main road**. This road **goes to** the town of Hindon, **which is 12 km away to the north-west**. The site is **in the countryside** and so would be able to accommodate a lot of car parking. Shoppers from both Hindon and Garlsdon could come here by car. As it is also **close to** the railway line linking the two towns to Cransdon (25 km **to the south-east**), a large number of shoppers would also be able to travel by train.

In contrast, the suggested location, S2, is right **in the town centre** and is **near the residential area**. People from the Hindon and Cransdon could also travel

by train. However, as the central area is **a no-traffic zone**, car drivers cannot access this place, which would be inconvenient.

Overall, neither site is appropriate for all the towns, but for customers in Cransdon, Hindon and Garlsdon, S1 would probably offer more advantages.

地图题（变迁题）（此类地图题考得比较多，需要重点复习）The two maps show an island before and after the construction of some tourist facilities. Summarize the information by selecting and reporting the main features, and make comparisons where relevant. （剑 9-1）

参考范文

The two maps show how an island changes before and after some tourist facilities are constructed.

According to the first map, the island is about 250 meters long, with a beach to the west and some trees in the eastern and western side of the island.

Moving on to the second map, we can see that the island has been constructed into a tourist resort with various facilities. Two accommodation areas have been built and the eastern one is larger. Each area consists of several houses, which are laid out in circular shape and connected via footpaths. Between the two accommodation areas there is a reception center surrounded by a vehicle track. This track leads to the restaurant in the north and to the pier in the south, where tourists can go sailing. Another change is that the western beach has been developed into a swimming area, which is accessible to tourists via a footpath linking the beach and the western accommodation units.

Overall, after the construction of these facilities, there are significant changes on the island and it has become an ideal place for recreational activities.
