举例

1. Even caffeine, which is generally known only for its stimulatory effects, displays this property, depressing mouse locomotion at very low concentrations and stimulating it at higher ones.

2. Well established among segments of the middle and upper classes by the mid-1800's, this new view of childhood spread throughout society in the late-nineteenth and early-twentieth centuries as reformers introduced child-labor regulations and compulsory education laws predicated in part on the assumption that a child's emotional value made child labor taboo.

3. For instance, early textile-mill entrepreneurs, *in justifying* women's employment in wage labor, made much of the *assumption that* women were by nature skillful at detailed tasks and patient in carrying out repetitive chores; the mill owners thus imported into the new industrial order hoary stereotypes *associated with* the homemaking activities *they presumed* to have been the purview of women.

4. The latter results in the production of large amounts of lactic acid *which can adversely affect* the pH of the seal's blood, but *since* the anaerobic metabolism occurs only in those tissues *which have been isolated* from the seal's blood supply, the lactic acid is released into the seal's blood only after the seal surfaces, *when* the lungs, liver, and other organs quickly clear the acid from the seal's bloodstream.
