例题: OG Argument 官方题库第44题

The following is part of a business plan created by the management of the Megamart grocery store:

“Our total sales have increased this year by 20 percent since we added a pharmacy section to our grocery store. Clearly, the customer’s main concern is the convenience afforded by one-stop shopping. The surest way to increase our profits over the next couple of years, therefore, is to add a clothing department along with an automotive supplies and repair shop. We should also plan to continue adding new departments and services, such as a restaurant and a garden shop, in subsequent years. Being the only store in the area that offers such a range of services will give us a competitive advantage over other local stores.”

Discuss how well reasoned . . . etc.

错误类比的攻击体系

The arguer's recommendation relies on what might be a poor analogy between A and B. The analogy falsely depends on the assumption that ____ in both A and B are similar. However, it is entirely possible that A与B的
差异. In short, without accounting for such possible differences between A and B, the arguer cannot prove that B will reap the similar benefits from the proposed method.
