6.3 Argument 写作指令-找证据

唐盛

写作指令

Writing Instructions

1. Write a response in which you discuss what specific evidence is needed to evaluate the argument and explain how the evidence would weaken or strengthen the argument.
2. assumption
3. question
4. question
5. question
6. question
- ...

找证据 - Discuss Evidence

Argument No. 4

The following appeared in an article written by Dr. Karp, an anthropologist.

"Twenty years ago, Dr. Field, a noted anthropologist, visited the island of Tertia and concluded from his observations that children in Tertia were reared by an entire village rather than by their own biological parents. However, my recent interviews with children living in the group of islands that includes Tertia show that these children spend much more time talking about their biological parents than about other adults in the village. This research of mine proves that Dr. Field's conclusion about Tertian village culture is invalid and thus that the observation-centered approach to studying cultures is invalid as well. The interview-centered method that my team of graduate students is currently using in Tertia will establish a much more accurate understanding of child-rearing traditions there and in other island cultures."

*Write a response in which you discuss what specific **evidence** is needed to evaluate the argument and explain how the evidence would weaken or strengthen the argument.*

找证据 - Discuss Evidence

Argument No. 4

The following appeared in an article written by Dr. Karp, an anthropologist.

"Twenty years ago, Dr. Field, a noted anthropologist, visited the island of Tertia and concluded from his observations that children in Tertia were reared by an entire village rather than by their own biological parents. However, my recent interviews with children living in the group of islands that includes Tertia show that these children spend much more time talking about their biological parents than about other adults in the village. This research of mine proves that Dr. Field's conclusion about Tertian village culture is invalid and thus that the observation-centered approach to studying cultures is invalid as well. The interview-centered method that my team of graduate students is currently using in Tertia will establish a much more accurate understanding of child-rearing traditions there and in other island cultures."

找证据 - Discuss Evidence

Argument No. 4

The following appeared in an article written by Dr. Karp, an anthropologist.

"Twenty years ago, Dr. Field, a noted anthropologist, visited the island of Tertia and concluded from his observations that children in Tertia were reared by an entire village rather than by their own biological parents. However, my recent interviews with children living in the group of islands that includes Tertia show that these children spend much more time talking about their biological parents than about other adults in the village. This research of mine proves that Dr. Field's conclusion about Tertian village culture is invalid (sub-c.) and thus that the observation-centered approach to studying cultures is invalid as well (conclusion). The interview-centered method that my team of graduate students is currently using in Tertia will establish a much more accurate understanding of child-rearing traditions there and in other island cultures."

找证据 - Discuss Evidence

The following appeared in an article written by Dr. Karp, an anthropologist.

"1) Twenty years ago, Dr. Field, a noted anthropologist, visited the island of Tertia and concluded from his observations that children in Tertia were reared by an entire village rather than by their own biological parents. However, my recent interviews with 2) children living in the group of islands that includes Tertia show that these children 3) spend much more time talking about their biological parents than about other adults in the village. This research of mine proves that Dr. Field's conclusion about Tertian village culture is invalid and 4) thus that the observation-centered approach to studying cultures is invalid as well. The interview-centered method that my team of graduate students is currently using in Tertia will establish a much more accurate understanding of child-rearing traditions there and in other island cultures."

找证据 - Discuss Evidence

The following appeared in an article written by Dr. Karp, an anthropologist.

The interview-centered method that my team of graduate students is currently using in Tertia will establish a much more accurate understanding of child-rearing traditions there and in other island cultures."

4. *Despite his invalid conclusion, Dr. Field's approach might still be valid.*
- a) *personal problem; b) no meta-analysis; c) observation is necessary*

找证据 - Discuss Evidence

The Scientific Method as an Ongoing Process

4. Despite his invalid conclusion, Dr. Field's approach might still be valid.
- a) personal problem; b) no meta-analysis; c) observation is necessary

找证据 - Discuss Evidence

The following appeared in an article written by Dr. Karp, an anthropologist.

"1) Twenty years ago, Dr. Field, a noted anthropologist, visited the island of Tertia and concluded from his observations that children in Tertia were reared by an entire village rather than by their own biological parents. However, my recent interviews with 2) children living in the group of islands that includes Tertia show that these children 3) still maintain their biological parents' traditions that are different from other adults in the village. This research of mine proves that Dr. Field's conclusion about Tertian village culture is invalid and 4) thus that the observation-centered approach to studying cultures is invalid as well. The interview-centered method that my team of graduate students is currently using in Tertia will establish a much more accurate understanding of child-rearing traditions there and in other island cultures."

4. *Despite his invalid conclusion, Dr. Field's approach might still be valid.*
- a) *personal problem; b) no meta-analysis; c) observation is necessary*

Argument No.4 - Analysis

1. Things might have changed since twenty years ago.
a) influenced by modern civilization;
b) the visiting anthropologists; c) Dr. Field
2. Dr. Karp might have ignore children from Tertia.
3. Talking about parents does not suggest being raised by them.
a) curious; b) hateful; c) missing;
d) Dr. Karp wasn't a careful reader.
4. Despite his invalid conclusion, Dr. Field's approach might still be valid.
a) personal problem; b) no meta-analysis; *c) observation is necessary*
