◆ 2.Problem Solving & Data Analysis

2.5 Center, Spread, and Shape of Distributions

1. Mean (平均数) :

The arithmetic mean (or simply "mean") of a sample X_1, X_2, \dots, X_n , usually denoted by \bar{x} , is the sum of the sampled values divided by the number of items in the sample.

◆ 2. Problem Solving & Data Analysis

2.5 Center, Spread, and Shape of Distributions

2. Median (中位数) :

In statistics, a median is the number separating the higher half of a data sample, a population, or a probability distribution, from the lower half. The median of a finite list of numbers can be found by arranging all the observations from lowest value to highest value and picking the middle one. For example, the median of {3, 3, 5, 9, 11} is 5; the median of {3, 5, 7, 9} is $(5 + 7) / 2 = 6$.

◆ 2. Problem Solving & Data Analysis

2.5 Center, Spread, and Shape of Distributions

3. Mode (众数) :

The mode of a sample is the element that occurs most often in the collection.

◆ 2.Problem Solving & Data Analysis

2.5 Center, Spread, and Shape of Distributions

4. Range (极差) :

The range of a sample is the difference between the biggest element and the smallest element.

◆ 2.Problem Solving & Data Analysis

2.5 Center, Spread, and Shape of Distributions

5. Variance (方差) :
其中n为样本容量, \bar{x} 为样本平均值

$$s^2 = \frac{1}{n} [(x_1 - \bar{x})^2 + (x_2 - \bar{x})^2 + \cdots + (x_n - \bar{x})^2]$$

◆ 2.Problem Solving & Data Analysis

2.5 Center, Spread, and Shape of Distributions

6. Standard Deviation (标准差) :

标准差 s 是方差的算术平方根。同样用来衡量数据的离散程度。数据越集中，标准差和方差越小；越离散，标准差和方差越大。

$$s^2 = \frac{1}{n} [(x_1 - \bar{x})^2 + (x_2 - \bar{x})^2 + \cdots + (x_n - \bar{x})^2]$$

◆ 2.5 Center, Spread, and Shape of Distributions

1.The mean score of 8 players in a basketball game was 14.5 points. If the highest individual score is removed, the mean score of the remaining 7 players becomes 12 points. What was the highest score?

- A.20
- B.24
- C.32
- D.36

2.5 Center, Spread, and Shape of Distributions

2.

| Electoral votes | Frequency |
|-----------------|-----------|
| 10 | 4 |
| 11 | 4 |
| 12 | 1 |
| 13 | 1 |
| 15 | 3 |
| 17 | 1 |
| 20 | 1 |
| 21 | 2 |
| 27 | 1 |
| 31 | 1 |
| 34 | 1 |
| 55 | |

Based on the table, what was the median number of electoral votes for the 21 states?

2.5 Center, Spread, and Shape of Distributions

3.

| State | Percent of residents |
|---------|----------------------|
| State A | 21.9% |
| State B | 27.9% |
| State C | 25.9% |
| State D | 19.5% |
| State E | 30.1% |
| State F | 36.4% |
| State G | 35.5% |

What is the difference between the median percent of residents who earned a bachelor's degree or higher for these 7 states and the median for all 50 states?

2.5 Center, Spread, and Shape of Distributions

4.

| Age | Frequency |
|-----|-----------|
| 18 | 6 |
| 19 | 5 |
| 20 | 4 |
| 21 | 2 |
| 22 | 1 |
| 23 | 1 |
| 30 | 1 |

A. mode < median < mean

B. mode < mean < median

C. median < mode < mean

D. mean < mode < median

2.5 Center, Spread, and Shape of Distributions

5.

A. $S_1 = S_2$ and $r_1 = r_2$

B. $S_1 < S_2$ and $r_1 < r_2$

C. $S_1 > S_2$ and $r_1 > r_2$

D. $S_1 \neq S_2$ and $r_1 = r_2$

2.5 Center, Spread, and Shape of Distributions

6.

| Number of days | Number of employees |
|----------------|---------------------|
| 0 | 8 |
| 1 | 4 |
| 2 | 3 |
| 4 | 4 |
| 5 | 5 |
| 13 | 1 |

What is the median number of days absent for the 25 employees last month?

2.5 Center, Spread, and Shape of Distributions

7.

| | 1 | 2 | 3 | 4 | 5 | Total |
|----------|----|----|-----|-----|----|-------|
| Adult | 13 | 35 | 103 | 82 | 17 | 250 |
| Children | 6 | 22 | 27 | 70 | 25 | 150 |
| Total | 19 | 57 | 130 | 152 | 42 | 400 |

How does the median rating of the adults who saw the movie compare to the median rating of the children who saw the movie?

Thanks
