For Yanshi

10年1月SAT, 2260, r750, m800, w710, 感谢CUUS, 满分网, 寄托网上的前辈, 感谢CUUS上的藏经阁, 感谢满分网猴哥的备考三部曲, 感谢猴哥3500, 感谢OC, OG真题(最关键)。大体按照猴哥备考三部曲的准备, 但是自己做了些调整。一共准备了三个月, 先是看红宝书, 但是没有坚持下来, 后来背猴哥8000, 考前背猴哥3500; 后来主要做了OC, OG与真题, 特别是按照猴哥的方法把错题标注了出来, 最后考前复习。最后真题, 真题是关键。最后一定要模考, 培养自己考试的节奏感。写作一定要坚持掐时间写, 要有自己的套路和例子。

由于真题的重要性, 攒人品, 制作了95--2010 OG真题大全供大家借鉴参考。希望自己的申请也满意。

ESSAY

Time — 25 minutes

The essay gives you an opportunity to show how effectively you can develop and express ideas. You should, therefore, take care to develop your point of view, present your ideas logically and clearly, and use language precisely.

Your essay must be written on the lines provided on your answer sheet—you will receive no other paper on which to write. You will have enough space if you write on every line, avoid wide margins, and keep your handwriting to a reasonable size. Remember that people who are not familiar with your handwriting will read what you write. Try to write or print so that what you are writing is legible to those readers.

Important Reminders:

- A pencil is required for the essay. An essay written in ink will receive a score of zero.
- Do not write your essay in your test book. You will receive credit only for what you write on your answer sheet.
- An off-topic essay will receive a score of zero.
- If your essay does not reflect your original and individual work, your test scores may be canceled.

You have twenty-five minutes to write an essay on the topic assigned below.

Think carefully about the issue presented in the following excerpt and the assignment below.

A person does not simply “receive” his or her identity. Identity is much more than the name or features one is born with. True identity is something people must create for themselves by making choices that are significant and that require a courageous commitment in the face of challenges. Identity means having ideas and values that one lives by.

Adapted from Thomas Merton, *Contemplation in a World of Action*

Assignment: Is identity something people are born with or given, or is it something people create for themselves? Plan and write an essay in which you develop your point of view on this issue. Support your position with reasoning and examples taken from your reading, studies, experience, or observations.

BEGIN WRITING YOUR ESSAY ON PAGE 2 OF THE ANSWER SHEET.

If you finish before time is called, you may check your work on this section only.
Do not turn to any other section in the test.

You have twenty-five minutes to write an essay on the topic assigned below.

Think carefully about the issue presented in the following excerpt and the assignment below.

We value uniqueness and originality, but it seems that everywhere we turn, we are surrounded by ideas and things that are copies or even copies of copies. Writers, artists, and musicians seek new ideas for paintings, books, songs, and movies, but many sadly realize, "It's been done." The same is true for scientists, scholars, and businesspeople. Everyone wants to create something new, but at best we can hope only to repeat or imitate what has already been done.

Assignment: Can people ever be truly original? Plan and write an essay in which you develop your point of view on this issue. Support your position with reasoning and examples taken from your reading, studies, experience, or observations.

You have twenty-five minutes to write an essay on the topic assigned below.

Think carefully about the issue presented in the following excerpt and the assignment below.

All people who have achieved greatness in something knew what they excelled at. These people identified the skills that made them special—good judgment, or courage, or a special artistic or literary talent—and focused on developing these skills. Yet most people achieve superiority in nothing because they fail to identify and develop their greatest attribute.

Adapted from Baltasar Gracián y Morales, *The Art of Worldly Wisdom*

Assignment: Do people achieve greatness only by finding out what they are especially good at and developing that attribute above all else? Plan and write an essay in which you develop your point of view on this issue. Support your position with reasoning and examples taken from your reading, studies, experience, or observations.

You have twenty-five minutes to write an essay on the topic assigned below.

Think carefully about the issue presented in the following excerpt and the assignment below.

Having many admirers is one way to become a celebrity, but it is not the way to become a hero. Heroes are self-made. Yet in our daily lives we see no difference between “celebrities” and “heroes.” For this reason, we deprive ourselves of real role models. We should admire heroes—people who are famous because they are great—but not celebrities—people who simply seem great because they are famous.

Adapted from Daniel Boorstin, *The Image: A Guide to Pseudo-Events in America*

Assignment: Should we admire heroes but not celebrities? Plan and write an essay in which you develop your point of view on this issue. Support your position with reasoning and examples taken from your reading, studies, experience, or observations.

SECTION 3

Time — 25 minutes

20 Questions

Turn to Section 3 (page 4) of your answer sheet to answer the questions in this section.

Directions: For this section, solve each problem and decide which is the best of the choices given. Fill in the corresponding circle on the answer sheet. You may use any available space for scratchwork.

Notes

1. The use of a calculator is permitted.
2. All numbers used are real numbers.
3. Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that the figure is not drawn to scale. All figures lie in a plane unless otherwise indicated.
4. Unless otherwise specified, the domain of any function f is assumed to be the set of all real numbers x for which $f(x)$ is a real number.

Reference Information

$$A = \pi r^2$$

$$C = 2\pi r$$

$$A = \ell w$$

$$A = \frac{1}{2}bh$$

$$V = \ell wh$$

$$V = \pi r^2 h$$

$$c^2 = a^2 + b^2$$

Special Right Triangles

The number of degrees of arc in a circle is 360.

The sum of the measures in degrees of the angles of a triangle is 180.

1. If $n = 3$ and $2n + 1 = b$, what is the value of b ?

(A) 3
(B) 4
(C) 5
(D) 6
(E) 7

2. Cliff earns \$15 per hour for each hour that he works as a television salesperson plus an additional \$10 for each television that he sells. Which of the following represents the amount Cliff earns, in dollars, if he sells n televisions while working h hours?

(A) $10h + 15n$
(B) $15h + 10n$
(C) $\left(\frac{10 + 15}{2}\right)(h + n)$
(D) $25(h + n)$
(E) $25hn$

GO ON TO THE NEXT PAGE

1, -4, 2, -3, -7, -6

3. If each number in the list above were to be multiplied by -3 , a new list would be formed consisting of the six products. How many of the six numbers on the new list would be negative numbers?

(A) Two
(B) Three
(C) Four
(D) Five
(E) Six

4. The rectangular card pictured above has a black dot on one side, and the other side is blank. Which of the figures below could be obtained by rotating the card?

(A) I only
(B) II only
(C) I and II only
(D) I and III only
(E) I, II, and III

5. On the number line above, which of the following is the best approximation of $|p - r|$?

(A) 2
(B) 3
(C) 3.5
(D) 4
(E) 4.5

Note: Figure not drawn to scale.

6. In the figure above, line r is parallel to line s . If $y = 18$, what is the value of x ?

(A) 53
(B) 54
(C) 55
(D) 56
(E) 57

7. If 90 percent of Jaime's compact discs cost \$15 each and if 10 percent of her compact discs cost \$12 each, what is the average (arithmetic mean) cost per disc?

(A) \$13.50
(B) \$13.75
(C) \$14.00
(D) \$14.70
(E) \$14.90

8. If m and p are positive integers, $2^m \cdot 2^p = 32$, and $(2^m)^p = 64$, which of the following could be the value of m ?

(A) 1
(B) 3
(C) 5
(D) 6
(E) 8

9. If $\frac{a}{10} + \frac{b}{10} = 10$, what is the value of $a + b$?

(A) 1
(B) 5
(C) 10
(D) 50
(E) 100

10. In Ms. Murray's art class, one-third of the students have taken at least one previous art class; of those, one-third have taken two or more previous art classes. Which of the following circle graphs could represent Ms. Murray's class divided into 3 different groups: those who have taken two or more previous art classes, one previous art class, or no previous art class?

(A)

(B)

(C)

(D)

(E)

11. Three consecutive integers are such that two times the largest is three times the smallest. What is the smallest of these three integers?

(A) -6
(B) -4
(C) 2
(D) 4
(E) 6

12. Point P lies in plane M . How many circles are there in plane M that have center P and a circumference of 6π inches?

(A) None
(B) One
(C) Two
(D) Four
(E) More than four

TEMPERATURE VS. TIME
FOR FIVE MIXTURES

Mixture	Temperature at t Seconds (°C)
A	$-3t + 2$
B	$-\frac{1}{3}t - 2$
C	$-\frac{1}{3}t + 2$
D	$\frac{1}{3}t - 2$
E	$3t - 2$

13. The table above gives the temperatures of five different mixtures at t seconds after the mixture formed. The temperature of which mixture falls greatest number of degrees during the period from $t = 9$ to $t = 12$?

(A) A
(B) B
(C) C
(D) D
(E) E

14. If p is an integer, which of the following must be true about $4p + 7$?

(A) It is odd.
(B) It is even.
(C) It is greater than 7.
(D) It is greater than p .
(E) It is divisible by 11.

If $n > 5$, then in terms of n , how much less than $n - 4$ is $5n + 3$?

- (A) $2n + 7$
- (B) $2n - 7$
- (C) $2n + 1$
- (D) $2n - 1$
- (E) $n + 7$

Note: Figure not drawn to scale.

6. In the figure above, the circle has center O . If the measure of arc \widehat{APB} is 56° , what is the value of x ?

- (A) 28
- (B) 34
- (C) 56
- (D) 62
- (E) 68

17. If $g(x) > 0$ for all real values of x , which of the following could be the function g ?

- (A) $g(x) = x + 1$
- (B) $g(x) = x - 1$
- (C) $g(x) = x^2 + 1$
- (D) $g(x) = x^2 - 1$
- (E) $g(x) = x^3 + 1$

18. How many different positive four-digit integers can be formed if the first digit must be 2, the last digit cannot be 0, and digits may be repeated?

- (A) 336
- (B) 900
- (C) 1,000
- (D) 9,000
- (E) 10,000

GO ON TO THE NEXT PAGE

$$xy = x + y$$

19. If $y > 2$, what are all possible values of x that satisfy the equation above?

(A) $x < 0$
(B) $0 < x < 1$
(C) $0 < x < 2$
(D) $1 < x < 2$
(E) $x > 2$

20. Which of the following represents the area of the five-sided figure shown above?

(A) $\frac{1}{2}x^2 + \frac{3}{2}y$
(B) $\frac{1}{2}x^2 + 3y$
(C) $3y - \frac{1}{2}(x - 3)$
(D) $3y + \frac{1}{2}(x - 3)$
(E) $3y + \frac{1}{2}(x - 3)^2$

**SECTION 4****Time — 25 minutes****25 Questions****Turn to Section 4 (page 5) of your answer sheet to answer the questions in this section.****Directions:** For each question in this section, select the best answer from among the choices given and fill in the corresponding circle on the answer sheet.

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five words or sets of words labeled A through E. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Hoping to ----- the dispute, negotiators proposed a compromise that they felt would be ----- to both labor and management.

- (A) enforce . . useful
(B) end . . divisive
(C) overcome . . unattractive
(D) extend . . satisfactory
(E) resolve . . acceptable

(A) (B) (C) (D) ☒

- Mala based her new online business in the -----, because she wanted to work far away from the crowded, expensive city.
(A) metropolis (B) neighborhood (C) countryside
(D) emporium (E) multitude
- In his vivid representations of the African American experience, painter Romare Bearden often used colors so ----- that viewers could not take their eyes off his works of art.
(A) sensible (B) residual (C) vibrant
(D) mannered (E) formulaic
- By discovering how to ----- an affordable substitute for cortisone from soybeans, Percy Julian helped to make arthritis treatment ----- large numbers of people.
(A) eliminate . . superfluous for
(B) synthesize . . prohibitive for
(C) compromise . . feasible for
(D) constitute . . irrelevant to
(E) create . . accessible to
- Although the women in the eighteenth and nineteenth centuries who undertook botanical illustration were primarily -----, their contributions as naturalists and cataloguers actually helped ----- the field as an academic discipline.
(A) researchers . . depreciate
(B) amateurs . . legitimize
(C) entrepreneurs . . subsidize
(D) biologists . . eschew
(E) historians . . chronicle
- To end his lecture on time, Professor Burke decided to ----- his final point and address it instead at the next class meeting.
(A) improvise (B) amend (C) forgo
(D) reiterate (E) promote
- Although A. S. Byatt's stories are elaborate and sometimes contain supernatural elements, her characters do not seem -----; on the contrary, they are quite -----.
(A) simplistic . . eccentric
(B) realistic . . memorable
(C) abstruse . . incomprehensible
(D) contrived . . plausible
(E) intricate . . complex
- Dr. Allan was told informally of several intriguing cases that accorded with her theory, but this ----- evidence could not provide the confirmation that a more ----- series of experiments would.
(A) anecdotal . . systematic
(B) theoretical . . convoluted
(C) impressionistic . . analogous
(D) unsubstantiated . . dilatory
(E) dogmatic . . rigorous
- Despite the ----- of books written about Greta Garbo, she ultimately remains -----, an inscrutable personality.
(A) ardor . . a paragon
(B) profusion . . an enigma
(C) bounty . . an icon
(D) obtuseness . . a paradox
(E) dearth . . a mystery

The passages below are followed by questions based on their content; questions following a pair of related passages may also be based on the relationship between the paired passages. Answer the questions on the basis of what is stated or implied in the passages and in any introductory material that may be provided.

Questions 9-10 are based on the following passage.

Line
5 When we came home, Aunt Sylvie would certainly be home, too, enjoying the evening, for so she described her habit of sitting in the dark. Evening was her special time of day. She gave the word three syllables, and indeed I think
10 she liked it so well for its tendency to smooth, to soften. She seemed to dislike the disequilibrium of counterpoising a roomful of light against a worldful of darkness. Sylvie in a house was more or less like a mermaid in a ship's cabin. She preferred it sunk in the very element it was meant to exclude.

9. The reference to Aunt Sylvie's pronunciation in line 4 serves to

- (A) capture a distinctive regional dialect
- (B) highlight a double meaning of a word
- (C) provide an ominous foreshadowing
- (D) underscore a particular misconception
- (E) give evidence of a contrary personality

10. The last sentence of the passage suggests that Sylvie felt a house should be a

- (A) shelter from darkness and danger
- (B) defense against unwelcome visitors
- (C) mysterious and adventurous place
- (D) reminder of the cabin of a ship
- (E) part of the world outdoors

Questions 11-12 are based on the following passage.

Line
5 Some people boast of having a sixth sense, professing to know or see things that others cannot. Fortune-tellers, mind readers, and mystics all lay claim to this power, and, in so doing, elicit widespread fascination in others, especially
10 book publishers and television producers. The questionable field of parapsychology is of course founded on the belief that at least some people actually possess this mysterious power. But to me, the real mystery is why so many fortune-tellers choose to work the phones on television psychic hotlines instead of becoming insanely wealthy stock traders on Wall Street.

11. The author implies that the "people" (line 1) are

- (A) mavericks
- (B) dilettantes
- (C) oracles
- (D) charlatans
- (E) pragmatists

12. The tone of the author's comment in the last sentence ("But . . . Street") is most accurately described as

- (A) sardonic
- (B) baffled
- (C) condescending
- (D) didactic
- (E) pensive

Questions 13-25 are based on the following passages.

These passages are adapted from observations made by two twentieth-century historians on how nations—and people—make use of their sense of their own history.

Passage 1

Line Although when we use the word “history” we
instinctively think of the past, this is an error, for history is
actually a bridge connecting the past with the present and
pointing the road to the future. This fact Daniel Webster
5 expressed many years ago in memorable nautical terms:
“... when the mariner has tossed for many days in thick
weather, and on an unknown sea, he naturally avails
himself of the first pause in the storm, the earliest glances
of the sun, to take his latitude and ascertain how far the
10 elements have driven him from his true course.” Webster
here indicates one of the cardinal utilities of history. Since
humanity is always more or less storm-driven, history
serves as a crucial navigational instrument for the nations
which, tossed as they are by wind and current, would be
15 lost in confusion if they could not identify their position.

History enables bewildered bodies of human beings
to grasp their relationship with their past, and helps them
chart their immediate forward course. And it does more
than this. By giving people a sense of continuity in all their
20 efforts, red-flagging error, and chronicling immortal worth,
it confers on them a consciousness of unity, a realization of
the value of individual achievement, and a comprehension
of the importance of planned effort, as contrasted with
aimless drifting.

25 Modern people, especially when harried and perplexed
by the sweep of events, peer earnestly into history for some
illumination of their predicament and prospects, even
though they may only read magazine articles or listen to
the radio or television. And when great events rouse people
30 to their most responsible temper, and fierce national ordeals
awaken them to a new sense of their capacities, they turn
readily to the writing of history, for they wish to instruct,
and to its reading, for they want to learn. It was no accident
that the First World War fostered such an interest in history
35 that for a time the number of books in English devoted to
history exceeded the titles in fiction.

Passage 2

The historian has much to answer for. History—that is,
written history and the examples it provides—has made
and unmade nations, given courage to the oppressed and
40 undermined the oppressor, has justified aggression and
overridden law. After Germany’s defeat of France in 1870,
a French historian exclaimed with unwilling admiration
that the nineteenth-century Germans used their history
as a means toward unity and a weapon of war; but that
45 the story of his own country as written by his compatriots
had taught the French people “above all to hate one

another.” Past heroism breeds future heroism, past
cowardice the cowardice of the future. History tends to
repeat itself by a process of almost deliberate imitation.

50 We have been told what to expect of ourselves and, by
expecting, we do it.

But what is this motivating force? What is written
history? The nineteenth-century English historian Froude
sonorously hailed it as “a voice forever sounding across
55 the centuries the laws of right and wrong.” Written history
is, in fact, nothing of the kind; it is the fragmentary record
of the often inexplicable actions of innumerable bewil-
dered human beings set down and interpreted according
to their own limitations by other human beings, equally
60 bewildered. The tribunal of history judges about as fairly
as any random batch of court judges. But only a minority
of people are able to recognize this fact, and, of that mi-
nority, only a minority will act upon it. The rest of us will
go through life with a silt of moral and political prejudice
65 washing about the brain—all derived directly and
indirectly, by way of textbooks and propaganda and
theaters and the marketplace, from historical writings.

It used to be said that history should be written without
prejudice, that the historian must not step aside to draw
70 a moral. The first cannot be done; the second should not.
Historians should always draw morals. If the accurate,
judicious and highly trained scholars fail to do so, the
unscrupulous and unqualified will do it for them, and
the deluded public will listen gaping to false but more
75 emphatic prophets. Historians who neglect the education
of the public are responsible for the villainous stuff to
which the public will go instead. A nation does not create
the historians it deserves; the historians are far more likely
to create the nation.

13. The author of each passage argues that people use
their nations’ history as a way to

- (A) bring about harmony among disparate groups
- (B) settle disputes over important precedents
- (C) make decisions about future actions
- (D) influence citizens of other nations
- (E) create myths fostering patriotism

14. The primary purpose of Passage 1 is to

- (A) define what is meant by the term “history”
in Western culture
- (B) draw a parallel between collective and
individual histories
- (C) describe the benefits of having a sense
of history
- (D) clarify misconceptions about history
- (E) justify the public’s interest in history

15. The author of Passage 2 would most likely argue that a nation's history differs from a "crucial navigational instrument" (line 13, Passage 1) in that history
- (A) may offer flawed, even misleading, direction
 - (B) is not easily understood by every head of state
 - (C) helps to promote embarrassment, even shame
 - (D) offers little guidance on certain national issues
 - (E) must be studied in the context of a society's values
16. In line 26, "the sweep of events" most directly refers to events that happen
- (A) secretly and remain undisclosed
 - (B) routinely and appear unimportant
 - (C) swiftly and seem overwhelming
 - (D) accidentally and inspire improvements
 - (E) predictably and confirm expectations
17. The author of Passage 1 assumes that historians function as
- (A) wise and respected policy makers
 - (B) strict and disciplined instructors
 - (C) adventurous and articulate explorers
 - (D) knowledgeable and indispensable guides
 - (E) carefree and impetuous speculators
18. The author of Passage 2 would most likely consider the "number" (line 35, Passage 1) an example of the
- (A) appetite for history that makes the public vulnerable to irresponsible historians
 - (B) demand for history books that makes unscrupulous historians wealthy
 - (C) interest in history that leads readers to overestimate their own expertise
 - (D) need for heroic figures whose stories provide inspiration
 - (E) tendency of history texts to proliferate during wartime
19. The primary purpose of Passage 2 is to
- (A) present a strongly held opinion
 - (B) describe the methodology of a historian
 - (C) analyze a famous historian's work
 - (D) defend a widely held point of view
 - (E) discredit the validity of a project
20. In line 54, "sounding" most nearly means
- (A) measuring
 - (B) greeting
 - (C) proclaiming
 - (D) fathoming
 - (E) examining
21. The author of Passage 1 would most likely characterize the "tribunal of history" mentioned in line 60, Passage 2 as
- (A) detached and uninformed
 - (B) divisive and demanding
 - (C) objective and illuminating
 - (D) vast and mysterious
 - (E) conventional and superficial
22. In line 74, "gaping" most directly emphasizes the
- (A) public's appetite for documented truths
 - (B) audience's susceptibility to persuasion
 - (C) scholars' approach to conducting research
 - (D) historians' desire to entertain readers
 - (E) readers' preference for familiar explanations
23. The author of Passage 2 argues that written history often functions as a
- (A) useful description of documented facts
 - (B) glorious commemoration of past greatness
 - (C) powerful motivation for future reforms
 - (D) dubious training in scholarly detachment
 - (E) questionable model for future conduct

24. The "minority" (line 61, Passage 2) would most likely view the "sense of continuity" mentioned in line 19, Passage 1 with

- (A) disdain for its political implications
- (B) ambivalence about its popular appeal
- (C) curiosity about its future effects
- (D) appreciation of its short-term advantages
- (E) skepticism about its accuracy

25. The author of Passage 1 and the author of Passage 2 differ most strongly on which topic?

- (A) The appeal of history
- (B) The reliability of historians
- (C) The impact of tumultuous events
- (D) The dearth of accessible historical documents
- (E) The relevance of the past to the present

NOTE: The reading passages in this test are brief excerpts or adaptations of excerpts from the published material. The ideas contained in them do not necessarily represent the opinions of the College Board or Educational Testing Service. To make the test suitable for testing purposes, we may in some cases have altered the style, contents, or point of view of the original.

SECTION 5

Time — 25 minutes

35 Questions

Turn to Section 5 (page 5) of your answer sheet to answer the questions in this section.

Directions: For each question in this section, select the best answer from among the choices given and fill in the corresponding circle on the answer sheet.

The following sentences test correctness and effectiveness of expression. Part of each sentence or the entire sentence is underlined; beneath each sentence are five ways of phrasing the underlined material. Choice A repeats the original phrasing; the other four choices are different. If you think the original phrasing produces a better sentence than any of the alternatives, select choice A; if not, select one of the other choices.

In making your selection, follow the requirements of standard written English; that is, pay attention to grammar, choice of words, sentence construction, and punctuation. Your selection should result in the most effective sentence—clear and precise, without awkwardness or ambiguity.

EXAMPLE:

Laura Ingalls Wilder published her first book and she was sixty-five years old then.

- (A) and she was sixty-five years old then
- (B) when she was sixty-five
- (C) at age sixty-five years old
- (D) upon the reaching of sixty-five years
- (E) at the time when she was sixty-five

(A) ● (C) (D) (E)

2. Bears in Yosemite National Park have been known to break into cars for food, candy, or even toothpaste, since such is the case, most campers heed posted warnings about the animals.
 - (A) toothpaste, since such is the case, most campers heed posted warnings about the animals
 - (B) toothpaste, with most campers therefore heeding posted warnings about the animals
 - (C) toothpaste, most campers heed posted warnings about the animals as a result
 - (D) toothpaste; and most campers heed posted warnings about the animals because of that
 - (E) toothpaste; therefore, most campers heed posted warnings about the animals
3. The annual National Concrete Canoe Competition attracts teams of engineering students having designed canoes that promote the versatility of concrete.
 - (A) having designed
 - (B) who have designed
 - (C) for designing
 - (D) to be designing
 - (E) and they designed
4. Anna Freud adapted classical psychoanalytic technique to the treatment of young children, being Sigmund Freud's daughter.
 - (A) Anna Freud adapted classical psychoanalytic technique to the treatment of young children, being Sigmund Freud's daughter.
 - (B) Anna Freud adapted classical psychoanalytic technique to the treatment of young children, and she was Sigmund Freud's daughter.
 - (C) Anna Freud, who as Sigmund Freud's daughter adapted classical psychoanalytic technique to the treatment of young children.
 - (D) Being Anna Freud, Sigmund Freud's daughter adapted classical psychoanalytic technique to the treatment of young children.
 - (E) Anna Freud, Sigmund Freud's daughter, adapted classical psychoanalytic technique to the treatment of young children.

1. The Women's Media Group recently launching an intern program in an effort to encourage minority women to think about careers in publishing and electronic media.
 - (A) The Women's Media Group recently launching an intern program
 - (B) The Women's Media Group recently would launch an intern program
 - (C) Recently launching an intern program, the Women's Media Group
 - (D) The Women's Media Group recently launched an intern program
 - (E) An intern program recently launched by the Women's Media Group

5. Mindful of the growing popularity of backyard compost piles among home gardeners, experts warn that adding meat, dairy products, or cooking grease to compost will attract vermin.
- (A) experts warn that adding meat, dairy products, or cooking grease to compost will
(B) adding meat, dairy products, or cooking grease to compost, this is what experts warn will
(C) and with warnings from experts that adding meat, dairy products, or cooking grease to compost will
(D) warnings from experts concerning the addition of meat, dairy products, or cooking grease to compost will
(E) experts warning that adding meat, dairy products, or cooking grease to compost would
6. Jawaharlal Nehru, the first Prime Minister of an independent India, was a foe of colonialism, an advocate of civil disobedience, and a master of political oratory.
- (A) was a foe of colonialism, an advocate of civil disobedience, and a master of
(B) was a foe of colonialism, an advocate of civil disobedience, and mastering
(C) was a foe of colonialism, advocated civil disobedience, and a master of
(D) was a foe of colonialism, an advocate of civil disobedience, and he mastered
(E) fought colonialism, was an advocate of civil disobedience, mastering
7. Strong wind, it having swept almost unchecked over great distances, is a prime component of the grassland climate.
- (A) it having swept almost unchecked over great distances,
(B) sweeping almost unchecked over great distances,
(C) being almost unchecked, will sweep over great distances, for it
(D) with almost unchecked sweeping over great distances,
(E) swept over great distances and almost unchecked,
8. Although she wrote 2,000 years ago, the Roman poet Sulpicia is still being read; her poems are available in English translation in a number of anthologies.
- (A) read: her poems are
(B) read, her poems are
(C) read; her poems being
(D) read: her poems are being
(E) read, yet her poems are
9. The apparently chaotic images in certain types of contemporary painting strike many viewers as both confusing but delightfully original.
- (A) but
(B) but also
(C) yet
(D) and as
(E) and
10. The director's insistence that there be adequate stage lighting and professionally installed backdrops in the theater was not obstinate but a determination to provide a safe work environment for the actors and stage crew.
- (A) was not obstinate but a determination
(B) was not obstinate but determined
(C) was not because of obstinacy, he was determined
(D) resulted not from obstinacy, but he was determined
(E) resulted not from obstinacy but from a determination
11. Researchers have found that large fish are most likely to contain high levels of mercury than small fish.
- (A) are most likely to contain high levels of mercury than small fish
(B) are more likely to contain high levels of mercury compared to small fish
(C) are more likely than small fish to contain high levels of mercury
(D) compared with small fish most likely contain high levels of mercury
(E) more likely contain higher levels of mercury than in small fish

The following sentences test your ability to recognize grammar and usage errors. Each sentence contains either a single error or no error at all. No sentence contains more than one error. The error, if there is one, is underlined and lettered. If the sentence contains an error, select the one underlined part that must be changed to make the sentence correct. If the sentence is correct, select choice E. In choosing answers, follow the requirements of standard written English.

EXAMPLE:

The other delegates and him immediately

A B C

accepted the resolution drafted by the

D

neutral states. No error

E

(A) (B) (C) (D) (E)

12. While working at Harvard Observatory classifying
A
stars, Antonia Maury becoming one of the first
B
astronomers to identify a spectroscopic binary star
C
with her discovery of Beta Aurigae in 1889. No error
D E
13. Before steamships started crossing the North Atlantic
in the early nineteenth century, the best way to travel
A
between Europe and America has been on sailing
B C
ships called "packets." No error
D E

14. The most successful algebra teachers do not have

A

their students simply memorize formulas and

B

equations; they make sure that their students also

C

understand the underlying mathematical concepts.

D

No error

E

15. Of three common approaches to writing music,

A

composers generally seem to find instrumental

B

C

improvisation the more congenial. No error

D

E

16. Among the most dangerous environmental threats that

A

we face are "compu-garbage," the nonbiodegradable

B

and often toxic waste resulting from the improper

C

disposal of obsolete personal computers. No error

D

E

17. Slanting through the trees, yesterday's late afternoon

A

sun cast more deeper shadows on the bedroom wall.

B

C

D

No error

E

18. After sampling the grapes, the six judges decided

A

B

that the homegrown produce tasted better than

C

the import company. No error

D

E

19. For most of recent history, people have used energy
A
wastefully, but now that supplies of essential fuels
B
are becoming rapidly depleted, environmentalists are
C
urging people to change it. No error
D E

20. As the guide led us through the exhibit of ancient
A
Russian icons, she interspersed explanations of the
objects with stories about her own first encounters
B C
with Russian art, giving you a unique personal
D
dimension to the tour. No error
E

21. The region bounded by the northwest corner of
A
Greenland, the northern tip of Labrador, and the
Mackenzie Delta include the islands collectively
B C
known as the Canadian Arctic Archipelago. No error
D E

22. Because traffic was unusually heavy, Jim arrived ten
A
minutes late for his job interview even though he had
B
ran desperately all the way from the bus stop.
C D
No error
E

23. As adults, male golden silk spiders live not in webs
A B
of their own making but rather in webs made by
C D
female spiders. No error
E

24. Mr. Hanson proudly demonstrated his company's
A B
latest cell phone, a model that flashes the time in
C
color-coded numerals when pressing a button.
D
No error
E

25. At a time when interest in twentieth-century classical
A
music seems on the verge to disappear, the avant-
B C
garde compositions of the 1960s and 1970s manage to
D
retain their popularity. No error
E

26. A powerful advocate to equal rights, Belva Lockwood

A

was twice a candidate for President long before the

B

Nineteenth Amendment to the Constitution allowed

C

women to vote. No error

D

E

27. Persistent use of antibacterial soaps in homes

both kills many innocuous bacteria

A

B

and encourages harmful ones to develop

C

even more resistant strains. No error

D

E

28. Annual visitors to New York City's Central Park

A

number almost ten times that of Mount Rushmore.

B

C

D

No error

E

29. To insist that a poem means whatever one wants it

A

B

to mean is often ignoring the intention and even

C

D

the words of the poet. No error

E

Directions: The following passage is an early draft of an essay. Some parts of the passage need to be rewritten.

Read the passage and select the best answers for the questions that follow. Some questions are about particular sentences or parts of sentences and ask you to improve sentence structure or word choice. Other questions ask you to consider organization and development. In choosing answers, follow the requirements of standard written English.

Questions 30-35 refer to the following passage.

(1) The decade after 1937 saw considerable growth in the African American press in the United States. (2) Traditionally, African American newspapers had been distributed only through the mail and at newsstands in a few large cities. (3) However, in 1938 LeRoy Brannic founded a newspaper distributorship, the Great Eastern News Corporation, in New York City, with outlets in cities throughout the country. (4) It was controlled and operated entirely by African Americans. (5) Brannic's company put African American newspapers into wide circulation across the country. (6) Though viewed as a modern means of mass communication, newspapers in fact date back to ancient Rome.

(7) Increased circulation brought more income with which African American publishers could improve production. (8) The Scott Syndicate in Atlanta, Georgia, was mass-producing 32 different newspapers by the mid-1940s. (9) Syndication offered the advantages of shared news, features, and printing, each paper still maintaining contact with its local community through a small staff employed there.

(10) Salaries rose, and while the older, self-made men retained ownership of the newspapers. (11) College-educated reporters began to join newspaper staffs. (12) Coverage expanded. (13) Some of the more successful papers could support their own foreign correspondents. (14) Increased use of photography in the newspapers, made possible by the purchase of expensive printing equipment, meant more work and better salaries for African American photographers.

30. In order to maintain a logical flow of ideas, which of the following sentences should be omitted from the passage?

(A) Sentence 3
(B) Sentence 6
(C) Sentence 9
(D) Sentence 12
(E) Sentence 13

31. In context, which of the following is the best revision of the underlined portion of sentences 4 and 5 (reproduced below)?

It was controlled and operated entirely by African Americans. Brannic's company put African American newspapers into wide circulation across the country.

(A) It was controlled and operated entirely by African Americans, and Brannic's company
(B) It was controlled and operated entirely by African Americans, though Brannic's company
(C) Being controlled and operated entirely by African Americans, it was Brannic's company that
(D) Controlled and operated entirely by African Americans, Brannic's company
(E) Brannic's company, which was controlled and operated entirely by African Americans, has

32. In context, which of the following is best placed at the beginning of sentence 8 (reproduced below)?

The Scott Syndicate in Atlanta, Georgia, was mass-producing 32 different newspapers by the mid-1940s.

(A) Unexpectedly, then,
(B) For example, one company,
(C) Nevertheless,
(D) In short,
(E) On the other hand,

33. In context, which is the best version of the underlined portion of sentence 9 (reproduced below)?

Syndication offered the advantages of shared news, features, and printing. each paper still maintaining contact with its local community through a small staff employed there.

(A) printing, and their papers still maintained
(B) printing; instead, each paper still maintained
(C) printing, while allowing each paper to maintain
(D) printing, though each paper maintains
(E) printing; each paper will still maintain

34. In context, what is the best way to deal with sentence 10 (reproduced below)?

Salaries rose, and while the older, self-made men retained ownership of the newspapers.

(A) Insert the word "had" immediately before "retained".
(B) Connect it to sentence 11 with a comma, changing "newspapers. College-educated" to "newspapers, college-educated".
(C) Switch it with sentence 11.
(D) Place it immediately before sentence 7.
(E) Change "while" to "yet".

35. In context, which is the best place to put the following sentence?

Syndication also created financial prosperity and new career opportunities for African Americans.

(A) Immediately before sentence 2
(B) Immediately before sentence 5
(C) Immediately before sentence 7
(D) Immediately before sentence 8
(E) Immediately before sentence 10

SECTION 6

Time — 25 minutes

18 Questions

Turn to Section 6 (page 6) of your answer sheet to answer the questions in this section.

Directions: This section contains two types of questions. You have 25 minutes to complete both types. For questions 1-8, solve each problem and decide which is the best of the choices given. Fill in the corresponding circle on the answer sheet. You may use any available space for scratchwork.

Notes

1. The use of a calculator is permitted.
2. All numbers used are real numbers.
3. Figures that accompany problems in this test are intended to provide information useful in solving the problems. They are drawn as accurately as possible EXCEPT when it is stated in a specific problem that the figure is not drawn to scale. All figures lie in a plane unless otherwise indicated.
4. Unless otherwise specified, the domain of any function f is assumed to be the set of all real numbers x for which $f(x)$ is a real number.

Reference Information

$$A = \pi r^2$$

$$C = 2\pi r$$

$$A = \ell w$$

$$A = \frac{1}{2}bh$$

$$V = \ell wh$$

$$V = \pi r^2 h$$

$$c^2 = a^2 + b^2$$

Special Right Triangles

The number of degrees of arc in a circle is 360.

The sum of the measures in degrees of the angles of a triangle is 180.

1. If $4x = 32$, then $\frac{1}{4}x =$

- (A) 1
(B) 2
(C) 4
(D) 8
(E) 32

2. A box contains 5 white, 6 red, and 9 blue marbles, and there are no other marbles in the box. If 1 marble is to be drawn at random from the box, what is the probability that the marble drawn will be white?

- (A) $\frac{1}{9}$
(B) $\frac{1}{6}$
(C) $\frac{1}{5}$
(D) $\frac{1}{4}$
(E) $\frac{1}{2}$

GO ON TO THE NEXT PAGE

3. If T is the set of even integers and S is the set of integers that are divisible by 7, which of the following integers is NOT contained in set T and is NOT contained in set S ?

(A) 4
(B) 10
(C) 28
(D) 35
(E) 39

5. For all positive integers n , let $n\blacklozenge$ be defined as the square of the greatest prime factor of n . For example, $6\blacklozenge = 9$, since the greatest prime factor of 6 is 3 and $3^2 = 9$. What is the value of $10\blacklozenge$?

(A) 2
(B) 4
(C) 5
(D) 25
(E) 100

4. In the figure above, how much greater is the perimeter of $\triangle ABC$ than the perimeter of $\triangle ADC$?

(A) 1
(B) 2
(C) 4
(D) 5
(E) 6

GO ON TO THE NEXT PAGE 

6. Line ℓ lies in the xy -coordinate plane and contains points $(2, 3)$ and $(9, 7)$. If line k is perpendicular to line ℓ , what is the slope of line k ?

(A) $-\frac{7}{4}$
(B) $-\frac{3}{2}$
(C) $-\frac{1}{3}$
(D) $\frac{7}{2}$
(E) $\frac{9}{2}$

8. The figure above shows the graph of $y = h(x)$, where h is a function. If $h(a) = h(2a)$, which of the following could be the value of a ?

(A) 1
(B) 2
(C) 3
(D) 4
(E) 5

7. Marsha is making a necklace. She starts with 2 red beads, 3 white beads, and 4 blue beads, in that order, and repeats the pattern until there is no more room on the necklace. If the last bead is white, which of the following could be the total number of beads on the necklace?

(A) 80
(B) 78
(C) 76
(D) 74
(E) 72

GO ON TO THE NEXT PAGE 

Directions: For Student-Produced Response questions 9-18, use the grids at the bottom of the answer sheet page on which you have answered questions 1-8.

Each of the remaining 10 questions requires you to solve the problem and enter your answer by marking the circles in the special grid, as shown in the examples below. You may use any available space for scratchwork.

Answer: $\frac{7}{12}$

Write answer in boxes. →

7	/	1	2
← Fraction line			
0	0	0	0
1	1	1	1
2	2	2	2
3	3	3	3
4	4	4	4
5	5	5	5
6	6	6	6
7	7	7	7
8	8	8	8
9	9	9	9

Grid in result. →

Answer: 2.5

2	.	5
← Decimal point		
0	0	0
1	1	1
2	2	2
3	3	3
4	4	4
5	5	5
6	6	6
7	7	7
8	8	8
9	9	9

Answer: 201
Either position is correct.

2	0	1
← Decimal point		
0	0	0
1	1	1
2	2	2
3	3	3
4	4	4
5	5	5
6	6	6
7	7	7
8	8	8
9	9	9

Note: You may start your answers in any column, space permitting. Columns not needed should be left blank.

- Mark no more than one circle in any column.
- Because the answer sheet will be machine-scored, **you will receive credit only if the circles are filled in correctly.**
- Although not required, it is suggested that you write your answer in the boxes at the top of the columns to help you fill in the circles accurately.
- Some problems may have more than one correct answer. In such cases, grid only one answer.
- No question has a negative answer.
- **Mixed numbers** such as $3\frac{1}{2}$ must be gridded as 3.5 or 7/2. (If $\boxed{3|1|/|2}$ is gridded, it will be interpreted as $\frac{31}{2}$, not $3\frac{1}{2}$.)

- **Decimal Answers:** If you obtain a decimal answer with more digits than the grid can accommodate, it may be either rounded or truncated, but it must fill the entire grid. For example, if you obtain an answer such as 0.6666..., you should record your result as .666 or .667. **A less accurate value such as .66 or .67 will be scored as incorrect.**

Acceptable ways to grid $\frac{2}{3}$ are:

2	/	3
← Fraction line		
0	0	0
1	1	1
2	2	2
3	3	3
4	4	4
5	5	5
6	6	6
7	7	7
8	8	8
9	9	9

.	6	6	6

1	1	1	1
2	2	2	2
3	3	3	3
4	4	4	4
5	5	5	5
6	6	6	6
7	7	7	7
8	8	8	8
9	9	9	9

.	6	6	7
← Decimal point			
0	0	0	0
1	1	1	1
2	2	2	2
3	3	3	3
4	4	4	4
5	5	5	5
6	6	6	6
7	7	7	7
8	8	8	8
9	9	9	9

9. If $\frac{x}{10} = 10$, what is the value of $\frac{20}{x}$?

10. The first term of a sequence is 160. After the first term, each term in the sequence is formed by dividing the immediately preceding term by 2. What is the eighth term of the sequence?

GO ON TO THE NEXT PAGE

11. In the figure above, K is a point on segment \overline{JL} . What is the value of d ?

13. A circle with a circumference of 16π is inscribed in a square, as shown in the figure above. What is the area of the square?

INVENTORY OF CARS AT
SMALLVILLE'S AUTO DEALER

	2-Door Models	4-Door Models
Blue	x	12
Red	6	8
White	2	6
Black	3	4
Other	5	10

12. The table above shows the inventory of cars that are available at an auto dealer, by color and model. If the dealer has twice as many 4-door models as 2-door models, what is the value of x ?

14. The population of rabbits in a controlled forest setting t months after observation began is modeled by the function R , where $R(t) = 250(4)^{\frac{t}{5}}$. According to this model, what is the population of rabbits 10 months after observation began?

$$\frac{a}{3} + \frac{b}{6} + \frac{c}{18} = 1$$

15. If a , b , and c are each positive integers in the equation above, what is one possible value of the product abc ?

16. Each of the containers shown above has a radius r of 3 inches and a height h of 6 inches. If the cone-shaped container is filled with water and this water is then poured into the empty cylindrical container, what will be the depth, in inches, of the water in the cylindrical container? (Volume of cone $= \frac{1}{3}\pi r^2 h$)

17. A number is added to 9 less than twice the number. If the result is 180, what is the number?

18. In the figure above, the graph of $y = 2x^2 - 9x + 9$ intersects the y -axis at P and the x -axis at R . What is the area of rectangle $OPQR$?

Do not turn to any other section in the test.

SECTION 7

Time — 25 minutes

24 Questions

Turn to Section 7 (page 6) of your answer sheet to answer the questions in this section.

Directions: For each question in this section, select the best answer from among the choices given and fill in the corresponding circle on the answer sheet.

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five words or sets of words labeled A through E. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Hoping to ----- the dispute, negotiators proposed a compromise that they felt would be ----- to both labor and management.

- (A) enforce . . useful
- (B) end . . divisive
- (C) overcome . . unattractive
- (D) extend . . satisfactory
- (E) resolve . . acceptable

(A) (B) (C) (D) ●

1. Knowing the rewards of -----, NASA astronaut Ellen Ochoa encourages students to study hard if they wish to pursue careers in science and engineering.
(A) generosity (B) serendipity (C) diligence
(D) individuality (E) merriment
2. The editor did not wish to print an article based on mere -----; she therefore ordered the reporter to find convincing -----.
(A) substantiation . . data
(B) speculation . . guesswork
(C) conjecture . . proof
(D) amicability . . rationalization
(E) explanation . . interpretation

3. Linda is ----- in matters large and small: she is inflexible in her opinions and utterly resistant to persuasion.
(A) facetious (B) avuncular (C) sanguine
(D) obdurate (E) tractable
4. Jason was truly -----, for he squandered a great deal of money with no thought for the future.
(A) prescient (B) infallible (C) reticent
(D) improvident (E) sedulous
5. The 1990's were ----- years for the organization: the staff was happy, customers were satisfied, and profits were excellent.
(A) halcyon (B) notorious (C) somnolent
(D) capricious (E) expedient

The passages below are followed by questions based on their content; questions following a pair of related passages may also be based on the relationship between the paired passages. Answer the questions on the basis of what is stated or implied in the passages and in any introductory material that may be provided.

Questions 6-9 are based on the following passages.

Passage 1

It was time to visit some sweets factories. Would they be magical, unpredictable places, like those in the movies, with steaming and chugging machines? The reality was far better. I visited half a dozen factories, and every time I entered one I was delirious with joy, ecstatic that the machines were exactly as I hoped they would be—long conveyor belts crammed with little sweets being prodded and poked, coated and dried, and extraordinary cauldrons and pipes and pushers and packers and printers and stampers and choppers and scrapers, all working away to produce super-fresh examples of super sweets, which were left lying around in vast piles, trays and buckets—as if I had stumbled on a candy El Dorado.*

Passage 2

The candy factory places all the foul props of the modern age in the service of our most innocent desires. To watch huge, metal machines plink out delicate chocolate bunnies—what delicious irony! The bogeyman of technology tamed! Bunnies not bombs! This is a lot of nonsense, of course. Candy companies are servants of global capitalism, just as surely as oil and plastics companies. They dehumanize workers, both here and abroad, pump out pollution, and provide an indulgence that is unconscionable, given the great many people on the planet who are starving.

* a legendary city of great wealth

6. Both passages suggest that

- (A) the candy manufacturing process has been patterned after processes used in other industries
- (B) real candy factories are even more intriguing than the ones featured in films
- (C) candy companies produce a variety of candy for a global market
- (D) candy production is highly mechanized
- (E) candy production is extremely costly

7. Compared with the tone of Passage 1, the tone of Passage 2 is more

- (A) ecstatic
- (B) sincere
- (C) pensive
- (D) evasive
- (E) indignant

8. In Passage 2, the sentence “This is a lot of nonsense, of course” (lines 18-19) marks a shift from

- (A) flowery description to unambiguous fact
- (B) facetious exclamation to earnest assertion
- (C) random description to concise prediction
- (D) a candid declaration to a somber apology
- (E) a historical recounting to a revisionist account

9. The author of Passage 2 would most likely regard the view expressed in Passage 1 as

- (A) endearing
- (B) discerning
- (C) insincere
- (D) naïve
- (E) pragmatic

Questions 10-15 are based on the following passage.

The following passage is adapted from a nineteenth-century short story. A group of men are in a small lifeboat after their ship has sunk during a storm.

The mind of the master of a vessel is rooted deep in the timbers of her, though he command for a day or a decade; and this captain had on him the stern impression of a scene in the greys of dawn of seven turned faces, and later a stump of a topmast with a white ball on it, that slashed to and fro at the waves, went low and lower, and down. Thereafter there was something strange in his voice. Although steady, it was deep with mourning, and of a quality beyond oration or tears.

"Keep 'er a little more south, Billie," said he.

"A little more south, sir," said the oiler in the stern.

A seat in this boat was not unlike a seat upon a bucking bronco, and by the same token a bronco is not much smaller. The craft pranced and reared and plunged like an animal. As each wave came, and she rose for it, she seemed like a horse making at a fence outrageously high. The manner of her scramble over these walls of water is a mystic thing, and, moreover, at the top of them were ordinarily these problems in white water, the foam racing down from the summit of each wave requiring a new leap, and a leap from the air. Then, after scornfully bumping a crest, she would slide and race and splash down a long incline, and arrive bobbing and nodding in front of the next menace.

A singular disadvantage of the sea lies in the fact that after successfully surmounting one wave you discover that there is another behind it just as important and just as nervously anxious to do something effective in the way of swamping boats. In a ten-foot dinghy one can get an idea of the resources of the sea in the line of waves that is not probable to the average experience, which is never at sea in a dinghy. As each slaty wall of water approached, it shut all else from the view of the men in the boat, and it was not difficult to imagine that this particular wave was the final outburst of the ocean, the last effort of the grim water.

There was a terrible grace in the move of the waves, and they came in silence, save for the snarling of the crests.

In the wan light the faces of the men must have been grey. Their eyes must have glinted in strange ways as they gazed steadily astern. Viewed from a balcony, the whole thing would doubtless have been weirdly picturesque. But the men in the boat had no time to see it, and if they had had leisure, there were other things to occupy their minds.

The sun swung steadily up the sky, and they knew it was broad day because the colour of the sea changed from slate to emerald green streaked with amber lights, and the foam was like tumbling snow. The process of the breaking day was unknown to them. They were aware only of this effect upon the colour of the waves that rolled toward them.

10. Which of the following best describes the primary focus of the passage?

- (A) The character of the captain
- (B) The boating skills of the men
- (C) The power of the sea
- (D) The fear of the men
- (E) The beauty of nature

11. The narrator's characterization of the captain's "voice" (line 7) suggests that the captain was

- (A) resolute and openly reckless
- (B) distressed, yet determined to persevere
- (C) domineering, yet considerate of others
- (D) concerned, but also optimistic
- (E) anxious and obviously impatient

12. The "singular disadvantage" mentioned in line 25 is that

- (A) it is difficult to tell where you are at sea because the view is always the same
- (B) sailors often misjudge the extent of their sailing skills when facing danger
- (C) every dangerous wave is followed by one that is equally dangerous
- (D) perilous situations at sea occur when sailors are least prepared for them
- (E) small boats are often swamped by rough seas during stormy weather

13. In line 25, "lies" most nearly means

- (A) reclines
- (B) resides
- (C) traces
- (D) deceives
- (E) extends

14. The sentence in lines 40-41 ("Viewed . . . picturesque") primarily indicates that

- (A) a detached observer might find the scene aesthetically intriguing
- (B) the men in the boat were not troubled by the sea's turbulence
- (C) the great distances involved at sea can make maintaining perspective difficult
- (D) only those with a keen sense of natural beauty can truly appreciate the sea
- (E) the best way to experience the sea's vastness is from an elevated position

15. In the last paragraph, the "men in the boat" (line 42) are described as

- (A) almost paralyzed by a sense of the inevitable doom facing them
- (B) keenly aware that the sea is both beautiful and dangerous
- (C) grateful to see daybreak because it signals a possibility of hope and rescue
- (D) oblivious to some aspects of the world around them
- (E) so overcome by exhaustion that they have lost the ability to respond to danger

Questions 16-24 are based on the following passage.

In this selection from a 1995 work, the author discusses the role of photography in her own family and in African American culture as a whole.

Growing up in the 1950's, I was somewhat awed and at times frightened by our extended family's emphasis on picture taking. Every wall and corner of my grandparents' (and most everybody else's) home was lined with photographs. When I was young, I never linked this obsession with self-representation to our history as a subjugated people.

For a long time cameras remained mysterious and off limits to all of us but my father. As the only one in the family who had access to the equipment, who could learn how to make the process work, my father exerted control over our images. In charge of capturing our family history with the camera, he called and took the shots. We were constantly being lined up for picture taking, and it was years before our household could experience this as an enjoyable activity, before any of the rest of us could be behind the camera. Until then, picture taking was serious business. I hated it. I hated posing. I hated cameras. I hated the images that cameras produced. I wanted to leave no trace. I wanted there to be no walls in my life that would, like gigantic maps, chart my journey. I wanted to stand outside history.

That was twenty years ago. Now that I am passionately involved with thinking critically about Black people and representation, I can confess that those walls of photographs empowered me, and that I feel their absence in my life. Right now I long for those walls, those curatorial spaces in the home that express our will to make and display images.

My mother's mother was a keeper of walls. Throughout my childhood, visits to her house were like trips to a gallery or museum—experiences we did not have because of racial segregation. We would stand before the walls of images and learn the importance of the arrangement, why a certain photograph was placed here and not there. The walls were fundamentally different from photo albums. Rather than shutting images away, where they could be seen only upon request, the walls were a public announcement of the primacy of the image, the joy of image making. To enter Black homes in my childhood was to enter a world that

valued the visual, that asserted our collective will to participate in a curatorial process.

Drawing from the past, from those walls of images I grew up with, I gather snapshots and lay them out to see what narratives the images tell, what they say without words. I search these images to see if there are imprints waiting to be seen, recognized, and read. Together, a Black male friend and I lay out the snapshots of his boyhood to see when he began to lose a certain openness, to discern at what age he began to shut down, to close himself away. Through these images, my friend hopes to find a way back to the self he once was. We are awed by what our snapshots reveal, what they enable us to remember.

The word *remember* (*re-member*) evokes the coming together of severed parts, fragments becoming a whole. Photography has been, and is, central to that aspect of racial empowerment that calls us back to the past and offers us a way to reclaim and renew life-affirming bonds. Using images, we connect ourselves to a recuperative, redemptive memory that enables us to construct identities, images of ourselves.

16. The author uses "obsession" in line 6 in order to

- (A) reveal her own strong interest in family history
- (B) demonstrate the extent of her involvement with her parents
- (C) show her admiration for her family's devotion to a hobby
- (D) suggest that there was something extreme about the adults' behavior
- (E) deplore the effects of excessive picture taking on the community

17. The author's attitude toward photography in lines 18-22 is best described as

- (A) mild impatience with a habitual activity
- (B) grudging approval of an unusual practice
- (C) intense resentment of an unwelcome intrusion
- (D) acute regret for a childhood misconception
- (E) growing ambivalence about a family tradition

18. In line 21, "chart" most nearly means

- (A) analyze statistically
- (B) present as a table
- (C) reward
- (D) predict
- (E) chronicle

19. In line 21, "journey" refers to the author's
- (A) progress through life
 - (B) development as a writer
 - (C) travel to visit distant relatives
 - (D) understanding of family history
 - (E) exploration of the local community
20. In line 26, "absence" refers metaphorically to a lack of a
- (A) constraining force
 - (B) cluttered space
 - (C) negative influence
 - (D) sustaining tradition
 - (E) joyful occasion
21. The author mentions "photo albums" in line 36 in order to
- (A) demonstrate the ease with which photographs can be assembled in an album
 - (B) help point out the effect of having photographs continuously on display
 - (C) illustrate her family's preoccupation with commemorating important occasions
 - (D) emphasize the variety in her grandmother's collections of photographs
 - (E) recall her childhood fascination with family photo albums
22. The friend's goal in examining snapshots (lines 47-53) is most analogous to which of the following?
- (A) A young man visits his father's childhood home in a distant city.
 - (B) A child interviews an older relative to record the family's history.
 - (C) A woman reads her childhood diary in an effort to rekindle past goals and values.
 - (D) Parents take annual photographs of their children to document the children's growth.
 - (E) A grandmother teaches her native language to her grandchildren.
23. The author uses the words "recuperative" and "redemptive" in line 59 to suggest that a memory can
- (A) protect us from the damaging effects of history and time
 - (B) play tricks on us by making the past seem better than it was
 - (C) exaggerate the feelings we had in childhood
 - (D) prevent people from repeating the mistakes of the past
 - (E) heal people by helping them determine who they are
24. The author uses "construct" in line 60 to make which point about a person's sense of identity?
- (A) People begin building their identities at a remarkably early age.
 - (B) Individuals create their identities partly from awareness of their heritage.
 - (C) Family members work together to perpetuate a single sense of identity.
 - (D) Young adults work hard to balance childhood and adult moral values.
 - (E) Photographers help their subjects determine appropriate social roles.

SECTION 8
Time — 20 minutes
18 Questions

Turn to Section 8 (page 7) of your answer sheet to answer the questions in this section.

Directions: For each question in this section, select the best answer from among the choices given and fill in the corresponding circle on the answer sheet.

Each sentence below has one or two blanks, each blank indicating that something has been omitted. Beneath the sentence are five words or sets of words labeled A through E. Choose the word or set of words that, when inserted in the sentence, best fits the meaning of the sentence as a whole.

Example:

Hoping to ----- the dispute, negotiators proposed a compromise that they felt would be ----- to both labor and management.

- (A) enforce . . useful
(B) end . . divisive
(C) overcome . . unattractive
(D) extend . . satisfactory
(E) resolve . . acceptable

(A) (B) (C) (D) (E)

1. Lumbee storyteller Barbara Braveboy-Locklear has performed in college theaters, powwows, and backyards, settings whose striking ----- highlights the ----- appeal that storytelling holds.
(A) formality . . diminishing
(B) variety . . insignificant
(C) uniformity . . ubiquitous
(D) diversity . . universal
(E) incongruity . . trivial
2. Thomas Edison, who found collaboration essential, never fit the popular stereotype of the ----- inventor, struggling alone in a garret.
(A) surly (B) cowardly (C) solitary
(D) weary (E) suspicious

3. Claudia is so adept at controlling her temper that she can seem quite ----- when she is actually -----.
(A) perturbed . . furious
(B) placid . . outraged
(C) serene . . tranquil
(D) stoic . . ebullient
(E) ambivalent . . reticent
4. The young man possessed ----- disposition, abjectly submissive to the will of others.
(A) an amiable (B) an inscrutable (C) a servile
(D) a jocular (E) a melancholy
5. Although other European states broke apart under the stresses of political upheaval, the seventeenth-century Dutch republic proved remarkably -----.
(A) propitious (B) illusory (C) resilient
(D) pertinent (E) poignant
6. It is her supremely skillful use of sophisticated laboratory instruments that makes Veronica the ----- research technician that she is.
(A) susceptible (B) consummate (C) visionary
(D) vitriolic (E) doctrinaire

The passage below is followed by questions based on its content. Answer the questions on the basis of what is stated or implied in the passage and in any introductory material that may be provided.

Questions 7-18 are based on the following passage.

The following excerpt is from a 1996 collection of essays written by a physicist.

I was somewhat embarrassed not so long ago when I opened a year-old physics journal and read that two Japanese fellows had attacked the same problem I was currently finishing up, obtaining an identical solution. The problem, not so consequential now as I reflect stochastically on my preempted calculations, concerned the spatial distribution that would eventually be achieved by a group of particles of different masses interacting with each other by gravity.

The underlying theories of gravity and thermodynamics necessary for solving such a problem are certainly well established, so I suppose I should not have been surprised to find that someone else had arrived at similar results. Still, my pulse raced as I sat with my notebook and checked off each digit of their answers, in exact agreement with mine to four decimal places.

After doing science for a number of years, one has the overwhelming feeling that there exists some objective reality outside ourselves, that various discoveries are waiting fully formed, like plums to be picked. If one scientist doesn't pick a certain plum, the next one will. It is an eerie sensation.

This objective aspect of science is a pillar of strength and, at the same time, somewhat dehumanizing. The very usefulness of science is that individual accomplishments become calibrated, dry-cleaned, and standardized. Experimental results are considered valid only if they are reproducible; theoretical ideas are powerful only if they can be generalized and distilled into abstract, disembodied equations.

That there are often several different routes to a particular result is taken as an indication of the correctness of the result, rather than of the capacity for individual expression in science. And always there is the continual synthesis, the blending of successive results and ideas, in which individual contributions dissolve into the whole. Such strength is awesome and reassuring; it would be a tricky business to land a person on the Moon if the spaceship's trajectory¹ depended on the mood of the astronauts, or if the Moon were always hurrying off to unknown appointments.

For these same reasons, however, science offers little comfort to anyone who aches to leave behind a personal message in his or her work, his own little poem or her own haunting sonata. Einstein is attributed with the statement that even had Newton or Leibniz never lived, the world would have had calculus, but if Beethoven had never lived, we would never have had the C-minor Symphony.

Max Delbrück, the physicist-turned-biologist, said in his Nobel Prize address, "A scientist's message is not devoid of universality, but its universality is disembodied and

- 50 anonymous. While the artist's communication is linked forever with its original form, that of the scientist is modified, amplified, fused with the ideas and results of others and melts into the stream of knowledge and ideas which forms our culture." It seems to me that in both science and
- 55 art we are trying desperately to connect with something — this is how we achieve universality. In art, that something is people, their experiences and sensitivities. In science, that something is nature, the physical world and physical laws. Sometimes we dial the wrong number and are later
- 60 found out. Ptolemy's theory of the solar system, in which the Sun and planets revolve about Earth in cycles and cycles within cycles, is imaginative, ingenious, and even beautiful — but physically wrong. Virtually unquestioned for centuries, it was ungracefully detonated like a condemned
- 65 building after Copernicus² came along.
- Very well. Scientists will forever have to live with the fact that their product is, in the end, impersonal. But scientists want to be understood as people. Go to any of the numerous scientific conferences each year in biology or
- 70 chemistry or physics, and you will see a wonderful community of people chitchatting in the hallways, holding forth delightedly at the blackboard, or loudly interrupting each other during lectures with relevant and irrelevant remarks. It can hardly be argued that such in-the-flesh gatherings are
- 75 necessary for communication of scientific knowledge these days, with the asphyxiating crush of academic journals and the push-button ease of telephone calls. But it is here, and not in equations, however correct, that we scientists can express our personalities to our colleagues and relish an appreciative smile. Sometimes I enjoy this as much as the
- 80 science.

¹ path of a moving body through space

² Nicolaus Copernicus (1473-1543) advanced the theory that Earth and other planets revolve around the Sun.

7. In line 20, the author uses the word "plums" to refer to the
- (A) multitude of problems needing to be solved
(B) existence of yet-to-be-discovered scientific truths
(C) fascinating nature of scientific discoveries
(D) rewards of fame and prestige for veteran researchers
(E) maturation of scientific investigations over long periods of time

8. In the context of the passage, the author's use of "dry-cleaned" (line 26) and "distilled" (line 29) most directly reflects the overall

- (A) concern for maintaining a sterile environment in the laboratory
- (B) fear that experimental results will be inappropriately judged
- (C) pleasure in precise and accurate experimentation
- (D) unease with the impersonal nature of scientific work
- (E) dissatisfaction with society's attitude toward scientific research

9. In lines 35-39 ("Such . . . appointments"), the author discusses space exploration primarily to explain how

- (A) certain areas of science can capture the public imagination
- (B) careful calculations affect space travel
- (C) the individual scientist contributes to the study of astronomy
- (D) space exploration is an expensive but necessary part of research in astronomy
- (E) the absence of subjectivity in the natural world has practical benefits

10. In line 53, "melts" most nearly means

- (A) liquefies
- (B) thaws
- (C) evaporates
- (D) merges
- (E) softens

11. The passage distinguishes between two types of "universality" (line 56) primarily by

- (A) comparing ways in which they are achieved
- (B) analyzing ways in which they have been interpreted
- (C) describing situations in which they contradict one another
- (D) providing famous examples of each from Nobel Prize winners
- (E) criticizing the notions they convey about worldly success

12. The author's overall tone in the passage is best described as

- (A) self-congratulatory
- (B) wistful
- (C) restrained
- (D) irate
- (E) nostalgic

13. In discussing Ptolemy's theory of the solar system (lines 60-65), the author suggests all of the following EXCEPT:

- (A) Ptolemy's work as a scientist suffered from a lack of creativity.
- (B) Copernicus' work eradicated the work of Ptolemy.
- (C) The scientific value of a theory depends on whether it stands up to the challenges of other scientists.
- (D) Scientific findings, even when based on inaccuracies, often are accepted as truth.
- (E) Both Ptolemy and Copernicus made influential contributions to theories about the solar system.

14. The implication of the author's statement "Very well" (line 66) is that the author

- (A) is more than willing to take on a new challenge
- (B) is concerned that scientists often make fundamental errors
- (C) is pleased with the accomplishments of other scientists
- (D) recognizes the need to accept an unpleasant fact
- (E) agrees with the most recent astronomical theories

15. The distinction between the "communication" mentioned in line 50 and the "communication" mentioned in line 75 most directly reflects the difference between

- (A) talking to oneself and listening to a knowledgeable instructor
- (B) expressing one's uniqueness and seeking friendship with an individual
- (C) sharing emotional experiences and analyzing past events
- (D) creating new objects and circulating existing relics
- (E) conveying a personal vision and exchanging objective information

16. In line 76, "crush" most nearly means

- (A) compression
- (B) infatuation
- (C) stampede
- (D) suppression
- (E) overabundance

17. The author suggests that scientists attend conferences to

- (A) learn what research their colleagues are presently pursuing
- (B) compare current lectures with the scientific knowledge already presented in journals
- (C) keep up with the most recent discoveries in their respective fields
- (D) participate in extensive personal interaction with colleagues
- (E) express orally their scientific disagreements with their colleagues

18. The author makes use of all of the following EXCEPT

- (A) comparison and contrast
- (B) personal experience
- (C) citation
- (D) anecdote
- (E) accusation

$$A = \pi r^2$$

$$C = 2\pi r$$

$$A = \ell w$$

$$A = \frac{1}{2}bh$$

$$V = \ell wh$$

$$V = \pi r^2 h$$

$$c^2 = a^2 + b^2$$

Special Right Triangles

The number of degrees of arc in a circle is 360.

The sum of the measures in degrees of the angles of a triangle is 180.

1. A rope is 20 feet long. What is the maximum number of pieces, each 20 inches long, that can be cut from the rope? (1 foot = 12 inches)

- (A) 6
(B) 10
(C) 12
(D) 18
(E) 24

Note: Figure not drawn to scale.

2. Lines j , k , and ℓ intersect at a point as shown above. If $y = 70$, what is the value of x ?

- (A) 20
(B) 30
(C) 40
(D) 45
(E) 55

GO ON TO THE NEXT PAGE

3, 9, x

3. The average (arithmetic mean) of the 3 numbers shown above is x . What is the value of x ?

(A) 3
(B) 4
(C) 5
(D) 6
(E) 9

5. Which of the following represents the statement, " x is 5 more than y "?

(A) $x = 5 + y$
(B) $x = 5y$
(C) $x + y = 5$
(D) $x + 5 > y$
(E) $x + y > 5$

4. The line graph above shows the average daily use of electricity, in kilowatt-hours, by a family for each month of a year, starting in July. For how many months of the year was the family's average daily use of electricity less than 20 kilowatt-hours?

(A) One
(B) Two
(C) Three
(D) Five
(E) Eight

6. At Middletown High School, 25 of the 150 juniors are members of the marching band. The fraction of the number of seniors who are members of the band is equal to the fraction of the number of juniors who are members of the band. How many of the 120 seniors are in the band?

(A) 10
(B) 15
(C) 18
(D) 20
(E) 24

8. George collected 90 tokens worth a total of 1,275 points. If each of the tokens has a value of either 15 points or 10 points, how many 15-point tokens did George collect?

(A) 15
(B) 17
(C) 67
(D) 73
(E) 75

7. Line ℓ intersects \overline{AC} at point B so that $AB < BC$, as shown above. If X , Y , and Z (not shown) are the midpoints of \overline{AB} , \overline{AC} , and \overline{BC} , respectively, which of the following must be true?

- I. A and X are on the same side of ℓ .
II. C and Y are on the same side of ℓ .
III. X and Z are on opposite sides of ℓ .

(A) I only
(B) II only
(C) III only
(D) I and III only
(E) I, II, and III

k	$f(k)$

9. The function f is defined by the table above. For what value of k does $f(k) - k = 0$?

(A) -2
(B) -1
(C) 0
(D) 1
(E) 2

10. The figure above shows a trapezoid divided into three triangles. What is the area of the shaded triangle?

(A) 44
(B) 46
(C) 48
(D) 50
(E) 52

11. What is the smallest possible integer value of x for which $(x - 8)(x + 5) < 0$?

(A) -8
(B) -7
(C) -6
(D) -5
(E) -4

12. In the xy -plane, three of the vertices of a square are $(0, 0)$, $(0, 3)$, and $(3, 0)$. If the square is reflected about the line $y = -x$, which of the following is one vertex of the resulting square?

(A) $(-3, -3)$
(B) $(-3, 3)$
(C) $(0, 3)$
(D) $(3, -3)$
(E) $(3, 0)$

13. Of the 240 campers at a summer camp, $\frac{5}{6}$ could swim.

If $\frac{1}{3}$ of the campers took climbing lessons, what was the least possible number of campers taking climbing lessons who could swim?

(A) 20
(B) 40
(C) 80
(D) 120
(E) 200

Note: Figure not drawn to scale.

14. In $\triangle MPQ$ above, the measure of $\angle M$ is 30° and the measure of $\angle Q$ is 45° . What is the length of segment \overline{MQ} ?

(A) 15
(B) 20
(C) $5\sqrt{2}$
(D) $5\sqrt{3}$
(E) $5\sqrt{3} + 5$

15. If $x^2 = y^3$ and $y > 1$, what does $x^{\frac{2}{3}}$ equal in terms of y ?

(A) y
(B) $y^{\frac{3}{2}}$
(C) y^2
(D) y^6
(E) y^9

$$z = x - y + 4$$

$$z = y - w - 3$$

$$z = w - x + 5$$

16. Based on the system of equations above, what is the value of z ?

(A) 2
(B) 3
(C) 4
(D) 6
(E) 12

STOP

SECTION 10

Time — 10 minutes

14 Questions

Turn to Section 10 (page 7) of your answer sheet to answer the questions in this section.

Directions: For each question in this section, select the best answer from among the choices given and fill in the corresponding circle on the answer sheet.

The following sentences test correctness and effectiveness of expression. Part of each sentence or the entire sentence is underlined; beneath each sentence are five ways of phrasing the underlined material. Choice A repeats the original phrasing; the other four choices are different. If you think the original phrasing produces a better sentence than any of the alternatives, select choice A; if not, select one of the other choices.

In making your selection, follow the requirements of standard written English; that is, pay attention to grammar, choice of words, sentence construction, and punctuation. Your selection should result in the most effective sentence—clear and precise, without awkwardness or ambiguity.

EXAMPLE:

Laura Ingalls Wilder published her first book and she was sixty-five years old then.

- (A) and she was sixty-five years old then
- (B) when she was sixty-five
- (C) at age sixty-five years old
- (D) upon the reaching of sixty-five years
- (E) at the time when she was sixty-five

(A) ● (C) (D) (E)

1. Born in Colombia in 1928, the Nobel Prize in Literature was awarded in 1982 to Gabriel García Márquez for his many novels.
 - (A) the Nobel Prize in Literature was awarded in 1982 to Gabriel García Márquez for his many novels
 - (B) the Nobel Prize in Literature, awarded to Gabriel García Márquez in 1982 for his many novels
 - (C) Gabriel García Márquez's many novels were why he was awarded the Nobel Prize in Literature in 1982
 - (D) his many novels brought Gabriel García Márquez the award of the Nobel Prize in Literature in 1982
 - (E) Gabriel García Márquez was awarded the Nobel Prize in Literature in 1982 for his many novels
2. Transportation of a new crew to the international space station being funded partly by scientists who were wanting work on the station to continue.
 - (A) being funded partly by scientists who were wanting work on the station to continue
 - (B) funded partly by scientists, they wanted the station's work to continue
 - (C) partly funded by scientists wanting the station continuing its work
 - (D) was funded partly by scientists who wanted work on the station to continue
 - (E) were funded by scientists in part wanting the station's work being continued

3. Alongside the trail on which we ride our bikes each morning run a crooked line of rugged old oak trees.
- (A) run a crooked line of rugged old oak trees
 - (B) runs a crooked line of rugged old oak trees
 - (C) runs rugged old oak trees in a crooked line
 - (D) there runs rugged old oak trees in a crooked line
 - (E) there run a crooked line of rugged old oak trees
4. Blinding rain and sudden dazzling flashes of lightning was obstructing our progress as we hurried back to our cars.
- (A) was obstructing
 - (B) were obstructing
 - (C) obstructing
 - (D) they obstructed
 - (E) obstructing us in
5. Because of pleading in vain for improved maintenance services, the tenants refused to pay rent until the landlord agreed to make the much-needed repairs.
- (A) Because of pleading in vain for improved maintenance services, the tenants refused
 - (B) Having pleaded in vain for improved maintenance services, the tenants refused
 - (C) The tenants pleaded in vain for improved maintenance services, thus, finally, refusing
 - (D) The tenants pleaded in vain for maintenance services to improve, then refusing
 - (E) Pleading for maintenance services to improve was in vain, which eventually caused the tenants to refuse
6. As rare as diamonds, some species of coral growing as deep as 2,000 feet beneath the sea and are highly prized in the Hawaiian jewelry trade.
- (A) growing as deep as
 - (B) that grow deeply up to
 - (C) grow as deep as
 - (D) has grown to the depth of
 - (E) grown as deeply as
7. The graduate studies office does its best with notification to students of missing documents required for graduation; however, it being their responsibility to file all the necessary paperwork.
- (A) with notification to students of missing documents required for graduation; however, it being their responsibility
